

THOMAS GREG & SONS DO BRASIL TO LAUNCH BIOMETRIC PAYMENT CARDS WITH ZWIPE

SAO BERNANDO DO CAMPO, BRAZIL – 9 APRIL 2019 – Biometric technology company Zwipe and Thomas Greg & Sons do Brasil (TGS), reference in Technology Solutions, Services of Identification and Printing of Security Documents in Brazil and in the world, one of the largest card manufacturers in Latin America with 55 million cards produced in 2018, have agreed to co-develop and launch biometric payment cards.

Commenting on this strategically important development President of Thomas Greg & Sons do Brasil, Hernani Finazzi said “We are excited to partner with Zwipe and leverage their industry leading expertise and intellectual property to be a first mover in Brasil with a product we believe has a strong value proposition to our customers, some of the region’s most established and fasted growing issuers.”

TGS intends to utilize Zwipe’s technology platform in bringing their biometric payment cards and other associated solutions to market. Development has begun with integration of the TGS payment card platform with Zwipe’s proprietary biometric technology with the first joint products planned for release in 2019. The two companies also confirmed that there are multiple banks in Brazil who have already engaged in serious dialogues to trial the solution.

Speaking on this important partnership André Løvestam, CEO of Zwipe said “ We are proud to partner with a leading and innovative first mover like TGS and looking forward to collaborating on new opportunities in Latin America and beyond.”

About Zwipe

Zwipe is a technology solution provider that enables battery-less, ultra-low-power, self-contained biometric authentication solutions. Together with an ecosystem of partners including global brands within security, financial services and ID applications, Zwipe is “Making Convenience Secure™” for banks, merchants and consumers. Using advanced fingerprint recognition while protecting personal information, Zwipe’s solutions address the data theft pitfalls inherent in traditional authentication methods. Headquartered in Oslo, Norway, Zwipe has spent the last 10 years developing its unique power harvesting technology platform in combination with security solutions based on international infrastructure standards.
