

Tampnet Selects Nowhere Networks as Strategic Supplier of Business-Critical Network Solutions

Tampnet, the leading offshore connectivity provider, has chosen Nowhere Networks as a strategic supplier of business-critical network technology to strengthen its robust offshore communications infrastructure. “Nowhere Networks solution is a perfect fit,” says Elie Hanna, CEO of Tampnet.

Tampnet operates the world’s largest high-capacity offshore network, delivering high-speed, low-latency, high-reliability communications via its proprietary fiber infrastructure to offshore rigs and platforms. As part of its ongoing commitment to innovation and delivering world-class service, Tampnet will now integrate Nowhere Networks’ intelligent and highly reliable network solution into its broader service offering.

“We selected Nowhere Networks after a thorough evaluation and found their solution to be a perfect fit,” says Elie Hanna, CEO of Tampnet.

“It delivers significant value both for us and our customers. The technology enables us to build faster and smarter, and we find it remarkably intelligent, reliable, and cost-effective. In addition to the hardware, Nowhere Networks also provides full-service

operations and support, which further strengthens our capabilities.”

“This marks a major milestone for Nowhere Networks as we enter the offshore segment alongside Tampnet,” says Asbjörn Frydenlund, CEO of Nowhere Networks.

“We are proud to support Tampnet’s mission and look forward to delivering hundreds of intelligent tracking units annually for many years to come — unlocking new value for Tampnet and its customers.”

This strategic partnership underscores a shared vision of reshaping global connectivity in even the most remote and demanding environments. By combining Tampnet’s extensive offshore footprint and fiber-based backbone with Nowhere Networks’ dynamic, cost-effective radio technology, the collaboration sets a new benchmark for hybrid connectivity. Together, the companies are enabling faster deployments, enhanced service reliability, and a new level of digital infrastructure performance that will power the next generation of offshore operations.

Tampnet

[Tampnet](#) provides first-class, high-capacity connectivity to the global offshore energy sector, enabling digitalisation, efficiency, and sustainability. By operating the world’s largest offshore network, Tampnet delivers reliable and scalable high-capacity, low-latency connectivity solutions that support safer, smarter, and more sustainable operations from site to shore. Through continuous innovation and focus on reduction of carbon footprint, Tampnet revolutionises offshore operations, contributing to a more sustainable energy production landscape. The company operates offshore telecom infrastructure in the North Sea and the Gulf of Mexico. More than offshore energy installations, as well as a large number of mobile rigs and vessels, receive high-speed data communication by Tampnet. The company has offices in Stavanger (headquarters), Aberdeen, Scott (LA), Houston (TX), Amsterdam, Rio de Janeiro, Trinidad and Tobago.

Nowhere Networks

[Nowhere Networks](#) is a leading, rapidly expanding high-tech company specializing in cost-effective internet broadband solutions for the shipping industry. It builds networks for high-speed internet globally and currently operates the largest radio-based broadband network for the maritime industry. The core business concept of Nowhere Networks is to provide internet connections of higher speed and quality to vessels at a significantly lower cost compared to other solutions available in the market. Additionally, Nowhere Networks offers supplementary services such as SD-WAN, Traffic Management and Optimization, Portal, and Payment Solution. Therefore, Nowhere Networks stands out as one of the most unique and comprehensive connectivity providers for the maritime industry worldwide.

About Nowhere Networks

Nowhere Networks is a fast-growing Swedish technology company and the world's largest provider of land-based internet connectivity for the maritime industry within our niche. With over 25 satisfied customers and a fleet of 150 connected vessels—including cruise ships and passenger ferries—we deliver a complete, all-inclusive subscription-based solution that includes both hardware and software.

Our service is more cost-effective than any comparable alternative, delivering high-speed, low-latency internet through our own purpose-built, high-capacity network. Developed and produced entirely in Sweden, our system combines intelligent onboard software, 24/7/365 NOC support, and seamless hybrid integration with technologies like LEO and LTE.

Clients such as Stena Line, Tallink, DFDS, Irish Ferries, and Destination Gotland trust Nowhere Networks for their critical connectivity. With us, ships stay connected and competitive.
