

News from Saab 5 June 2026

Saab news at Eurosatory 2026

Saab will be exhibiting at Eurosatory, Nord Villepinte Exhibition Centre, Paris from 15-19 June. The main Saab stand will be in Hall 6, Stand G180, with a separate outdoor stand at Stand C80.

Visitors are welcome to visit the main Saab stand to discuss several new solutions for the battlefield. With a 50% larger warhead, the new Bolide 2 air defence missile brings a greater punch for RBS 70 operators. For the individual soldier, the new Barracuda Poncho brings a more tailored solution to minimise the chance of detection where thermal sensors abound. Come and hear how the new HEAT 758 round for the Carl-Gustaf weapon gives infantry the means to fight back against tanks equipped with explosive reactive armour.

Saab will also display its Counter-Unmanned Aerial System (C-UAS) suite of systems that customers depend on to better detect and defend against these threats from the sky.

For the media, Saab will be holding two press briefings:

Tuesday 16 June 15:00-15:55 Stand G180 (Hall 6)

Giraffe radars serve around the world providing the operational advantage that early detection brings. Come along to hear about the latest evolution within the Giraffe radar portfolio.

Wednesday 17 June 11:00-11:45 Stand C80 (Outdoor area)

Media are welcome to come and experience firsthand the latest Studio version of the Ground Combat Indoor Trainer. Launched late 2025, it brings outstanding fidelity in the simulation of ballistics, effects, protection and replica targets in various scenarios.

So, discover these examples and more of Saab's solutions at Eurosatory and explore how we turn innovation into modular, mission-ready capabilities for today's and tomorrow's challenges.

Saab is a leading defence and security company with an enduring purpose, to help nations keep their people and society safe. Empowered by its 28,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
