

## ALOGIC launches in the UK with two state of the art docking stations

ALOGIC, the Australian manufacturer of a range of high-quality PC and Mac peripheral equipment, has debuted in the UK with distributor Westcoast. Across a range of over 4,000 products, ALOGIC has carved out a reputation for elegant, design-led hardware that still delivers on the levels of functionality and reliability expected by customers, with a two-year warranty across the board and 24 hour phone support available. This ethos is the perfect match for the service-led approach of Westcoast and brings pan European availability to the ALOGIC product range.

ALOGIC USB-C Dock Nano Gen 2

ALOGIC'S arrival in the UK coincides with the launch of two state-of-the-art USB C docking systems. Designed to offer class-leading performance and connectivity combined with superb industrial design, both solutions are every bit as elegant as the computers that they being connected to.

The USB C Dock PLUS is designed to complement the latest USB C and Thunderbolt equipped computers. Making connection via a single USB C cable, the Dock Plus supports either a single monitor with up to 4K resolution when using the HDMI or Mini DisplayPort outputs, or it can also support two monitors with up to 1080p FULL HD resolution simultaneously, when the HDMI and Mini DisplayPort outputs are used together.

This dock also features 2 x USB 3.1 (USB-A) ports for your standard USB accessories, 1 x gigabit ethernet, 1 x Micro SD and SD Card Readers and 1 x USB-C port with support for up to 100W of Power Delivery for charging your laptop when connected to a suitable USB-C Charger.

ALOGIC USB-C Dock PLUS

The USB-C Dock Nano Gen 2 is designed specifically to match with the MacBook Pro (2016 onwards) and the Macbook Air (2018 onwards). It mates seamlessly with these products, physically connecting to both power and signal inputs and assuming the role of both. To this end, it supports 4K HDMI, two USB A, one USB C and Micro and SD card readers. Power can be sent to it and it will in turn keep your MacBook charged while vastly increasing the connectivity on offer.

No less importantly, the build and finish is as impressive as the technology it contains. Available in both Space Grey or Silver, the USB C Dock PLUS looks every inch the piece of cutting edge technology it is. Neither is this purely for show. The casework ensures comprehensive shielding against electromagnetic interference to ensure performance remains unaffected. The USB- C Dock Nano Gen 2 combines Aluminium and ABS in a compact and portable device that complements the industrial design of the MacBook range. Designed to be easily carried with the laptop, both devices vastly increase the laptop's capability as a workstation.

Both devices are on sale now:

USB C Dock PLUS	-	£109.99 Inc. VAT
USB-C Dock Nano Gen 2	-	£69.99 Inc. VAT

#### Notes For Editors

#### About ALOGIC – [www.alogic.co](http://www.alogic.co)

ALOGIC is a leading manufacturer of a Premium range of IT Peripherals, consumer electronics and mobility products. We are dedicated at making products that help realize the true potential of technology in making our lives simpler and efficient everyday.

We have pioneered the market at making products, which are Smart and Simple at the same time. Our products are designed to "just work" with the easiest to use design. All the products are researched & developed in house by our R&D team. An industry first, most of our products are backed by LIFE TIME WARRANTY, which reflects the confidence we have in our end to end research, engineering and manufacturing capabilities.
