## Lumera migrates 58 million transactions for Nordea Liv Norway

**Lumera has completed two major migrations for Nordea Liv Norway as part of the company's policy administration modernisation. During the first half of 2026, over 70,000 contracts, 163,000 investment accounts and more than 58 million transactions were migrated to the new cloud-based Lumera platform.**

**Oslo, June 16, 2026** – Lumera, a leading insurtech company dedicated to the digital transformation of the European Life and Pensions industry, announces the successful completion of two major migrations for Nordea Liv, a leading Nordic life insurance and pensions provider.

The migrations mark an important milestone in the collaboration between Lumera and Nordea Liv, demonstrating Lumera's ability to execute complex transformation projects on a large scale.

"This project is a comprehensive undertaking, with large volumes of data and strict demands on quality and stability. Working closely with Nordea Liv, we have now completed two important migrations that lay the foundation for further modernisation and development," says Jonas Alfredson, CEO of Lumera Group.

Lumera has been collaborating with Nordea Liv since 2023 to introduce a new platform for Life and Pensions policy administration in Norway. The project leverages Lumera's methodology for implementation and data migration, where the company manages planning, development, migration and production launch.

"This implementation project demonstrates that Lumera has the technology, expertise and experience required to deliver complex migrations for the Nordic Life and Pensions market leaders," says Jonas Alfredson.

For Nordea Liv, the new solution means a modernised core enterprise system that enables new digital services and reduce the complexity of its application landscape.

"This is an important milestone in the modernisation of our systems. Together with Lumera, we have completed an extensive migration that lays a solid foundation for further development and innovation," says Anders Granstad, CEO of Nordea Liv Norway.

The migrations are part of a larger transformation program which is progressing according to plan and set to be completed by 2030.
