

Carbiotix continues to add new NutraCycle projects in the third quarter

Carbiotix AB (publ) ("Carbiotix" or the "Company") announces today the Q3 2025 update of NutraCycle projects. Since June 30th 2025, the total number of customer projects has increased by 8. Carbiotix now has a total of 61 customer projects. The Company added 9 new customer side-streams, bringing the total number of side-streams to 75. Additionally, Carbiotix continues with its ambition of starting five Joint Commercial Development Agreement (JCDA) projects in the second half of 2025. A JCDA project consists of two phases: (1) formulation validation with one or several F&B (Food & Beverage) CPG (Consumer Packaged Goods) companies, and (2) engineering specification and investment development.

Erik Deaner, CEO of Carbiotix, comments:

"I am once again very pleased with the growth in NutraCycle customer projects since Carbiotix last reported customer projects at the end of June. During Q3, we added 8 new customers and aim to add one new customer project per week on average. With the customer projects now totalling 61 over 75 different side-streams, we have built a wealth of knowledge about the potential of different side-streams which we will use as we ramp up marketing efforts related to our recently launched NutraCycle Formulation Lab service directed towards F&B CPG companies.

Going forward, we see many exciting developments, and Carbiotix will:

- Pursue its goal of starting five JCDA projects in second half of 2025.
- Integrate the Pilot Pre-Study project into JCDA to simplify customer acquisition and increase the focus on formulation validation as a key first step.
- Leverage a strong pipeline in terms of the number, size, and suitability of customers for its collaborative onsite upcycling and fortification business model."

Forward-looking statements

This communication contains forward-looking statements, consisting of subjective assumptions and forecasts for future scenarios. Predictions for the future only apply as of the date they are made and are, by their nature, as is research and development work in the biotechnology segment, associated with risk and uncertainty. With this in mind, the actual outcome may deviate significantly from the scenarios as described in this press release.

This is information that Carbiotix AB is obliged to make public according to the EU Market Abuse Regulation (MAR). The information was made publicly available by the Company's contact person set out below on 30 September 2025.
