

News release from Vestas Northern and Central Europe

Hamburg, 29. September 2018

Vestas secures first order for V150-4.2 MW in Germany

Vestas has received a 12 MW order from long-term customer NOTUS energy Plan GmbH & Co. KG for two V150-4.2 MW turbines and one V136-3.6 MW turbine for the Lübbenow II and Lübbenow III projects, located in Lübbenow in Brandenburg, Eastern Germany.

The order is the first for the V150-4.2 MW turbine in Germany and will be among the first V150-4.2 MW turbines to be commissioned worldwide.

"After nearly 20 years as a project developer and successful cooperation with Vestas, we are proud to be the first ones in the world to commission the new V150-4.2 MW with its trendsetting, highly-efficient technology in 2019. We are convinced by the outstanding cost-effectiveness of the new 4 MW platform and its variants with its large rotors and generators. We are optimistic about the future of the German wind market even in difficult times with regard to slow permitting processes", says Heiner Röger, Managing Director at NOTUS energy Plan GmbH & Co. KG

"This order from our long-term customer NOTUS energy Plan GmbH & Co. KG underlines the efficient technology of our 4 MW platform. The V150-4.2 MW is the perfect fit for the site in Lübbenow, providing high annual production and low levelised cost of energy", states Alex Robertson, Vice President of Sales for Germany, Austria and Switzerland at Vestas.

The Lübbenow project will feature VestasOnline® Business SCADA solution to lower turbine downtime and optimise energy output. The contract further includes supply, installation and commissioning of the wind turbines, as well as a 20-year Active Output Management 4000 (AOM 4000) service agreement. Turbine installation and commissioning is scheduled for third quarter of 2019.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with 94 GW of wind turbines in 79 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 79 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 24,300 employees are bringing the world sustainable energy solutions to power a bright future.
