

**News release from
Vestas-American Wind Technology**

Portland, 29 December 2017

Vestas' receives 190 MW order in the U.S. and passes 10.5 GW in global order intake for 2017

Vestas has received a firm and unconditional order for 190 MW of 4 MW platform turbines in the U.S. that takes Vestas' global order intake in 2017 to 10,595 MW, surpassing 2016's record order intake of 10,494 MW. The 2017 order intake is based on announced orders in all four quarters of 2017 as well as unannounced orders in the first three quarters of 2017. Unannounced MW of orders received in the fourth quarter of 2017 will be disclosed in the annual report in February 2018.

The development, construction, and operation of these turbines will deliver substantial economic impact for both the local and state economies, including funds from additional tax revenue, landowner payments and other contributions to the local community, and the creation of both part-time and full-time permanent local jobs. In 2016, the wind industry added jobs nine times faster than the overall U.S. economy, and today there are more than 102,000 wind workers.

Customer and project names are undisclosed at the customer's request.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 87 GW of wind turbines in 76 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,700 employees are bringing the world sustainable energy solutions to power a bright future.
