

News release from Vestas-American Wind Technology

Portland, 30 June 2017

Vestas receives 302 MW order in the United States

MidAmerican Energy places 302 MW order for its 2,000 MW Wind XI project in Iowa.

With reference to Vestas Wind Systems A/S' company announcement No. 26/2017 of 30 June 2017, Vestas has received a firm and unconditional order from MidAmerican Energy Company, a subsidiary of Berkshire Hathaway Energy, for 170 V110-2.0 MW turbines for the Wind XI project. The order includes previously purchased PTC-qualifying components.

The turbines will be manufactured at Vestas' Colorado factories and will be delivered in the second quarter 2018. The order includes supply and commissioning of the wind turbines as well as a five-year Active Output Management 5000 (AOM5000) service agreement, Vestas' full-scope service package maximizing uptime and energy production.

"The historic Wind XI project will deliver clean, low-cost wind energy to MidAmerican Energy's customers and communities while enhancing the reliability and resiliency of the grid. Hundreds of millions of dollars in economic benefits, including landowner lease payments, tax payments, and long-term secure jobs, will be generated to support the manufacturing, construction and operation of this project," said Chris Brown, President of Vestas' sales and service division in the United States and Canada.

MidAmerican Energy is the largest regulated utility owner of wind energy in the U.S. When fully operational, the Wind XI project will ensure the utility generates 85 percent of its retail energy load from wind.

The Wind XI project consists of multiple sites in Iowa that will be placed into service between 2017 and 2019. Potential future order intake under overall agreement linked to the Wind XI project is expected to occur as partial deliveries under the master agreement and will be announced firm and unconditional consistent with Vestas' order announcement policy.

With more than 36 GW installed in 45 countries on six continents since its debut, Vestas' 2 MW platform is the most widely installed platform in the industry.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 83 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 73 GW of wind turbines under service, we use data to

interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 22,000 employees are bringing the world sustainable energy solutions to power a bright future.
