

News release from Vestas-American Wind Technology

Portland, 29 December 2016

Vestas receives 140 MW order in the United States

BHE Renewables, an affiliate of Berkshire Hathaway Energy, has placed a firm and unconditional order for 140 MW of V110-2.0 MW turbine components that enable future project pipeline.

The turbines add to Vestas' growing portfolio with BHE Renewables and will be manufactured at Vestas' Colorado factories.

"This order grows our portfolio with BHE Renewables and we are proud of the continued trust they show Vestas. We look forward to working together with BHE Renewables to deploy more low-cost reliable wind energy in the U.S.," said Chris Brown, President of Vestas' sales and service division in the United States and Canada.

Vestas and BHE Renewables announced their first order in 2015, with the 400 MW Grande Prairie project. Grande Prairie is the largest wind project in Nebraska and recently achieved commercial operation.

Berkshire Hathaway Energy owns one of the largest renewable energy portfolios in the U.S., with BHE Renewables overseeing the unregulated renewable energy portion of their portfolio. Berkshire Hathaway Energy also owns a portfolio of other energy businesses including the utilities PacifiCorp, MidAmerican Energy Company, and NV Energy.

About Vestas

Vestas is the energy industry's global partner on wind power solutions. We design, manufacture, install, and service wind turbines across the globe, and with 78 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 68 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 21,900 employees are bringing the world sustainable energy solutions to power a bright future.
