

## News release from Vestas Mediterranean

Madrid, 28 December 2016

### Vestas wins first orders in Honduras

*The firm and unconditional orders total 59 MW of V117-3.45 MW turbines and are Vestas' first in Honduras.*

Both orders are Engineering, Procurement and Construction (EPC) contracts that include the supply and installation of the wind turbines as well as the electrical and civil works, substation, and access roads. Additionally, a 15-year full-scope service agreement (AOM 5000) will ensure optimal performance of the wind turbines.

Honduras is the second new market for Vestas in 2016, underlining Vestas' unparalleled and expanding global reach. Turbine delivery is planned for the first quarter of 2017, while commissioning is expected for the fourth quarter of 2017.

*"Supplying wind turbines and service solutions are only part of our business, and getting these two Engineering, Procurement and Construction contracts in Honduras, which becomes Vestas' second new market in 2016, demonstrates Vestas' ability to meet customers' wind energy needs anywhere in the world",* highlights President of Vestas Mediterranean, Marco Graziano.

#### About Vestas

Vestas is the energy industry's global partner on wind power solutions. We design, manufacture, install, and service wind turbines across the globe, and with 78 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 68 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 21,900 employees are bringing the world sustainable energy solutions to power a bright future.
