

## News release from Vestas Northern Europe

Malmö, 07 December 2016

# Vestas wins 79 MW order in Sweden

*Eolus Vind AB has placed their largest wind power order to date, comprising 23 V126-3.45 MW turbines for the Jenåsen wind power plant.*

Vestas has received a firm and unconditional order for the Jenåsen wind power plant, which will be the first plant in a larger wind power project in Sundsvall municipality, Sweden. The project is another result of the strong partnership between Eolus and Vestas, going back 25 years.

*“Jenåsen will be our biggest wind power project to date and is the result of our long-term relationship with Vestas and our trust in their technology. Vestas V126-3.45 MW proved to be the optimal match for the site, providing just the right business case for the project and speaking to our ambition of developing wind farms at the lowest possible cost of energy”,* says Per Witalisson, CEO of Eolus.

Klaus Steen Mortensen, President at Vestas Northern Europe, adds: *“This order proves that the right wind energy solution can provide a strong business case anywhere, including Sweden where the market is affected by low electricity and green certificate prices”.*

The contract includes supply and installation of the wind turbines as well as a 5-year Active Output Management 5000 (AOM5000) service agreement. Delivery of the wind turbines is expected to begin in the first quarter of 2018.

### About Vestas

Vestas is the energy industry's global partner on wind power solutions. We design, manufacture, install, and service wind turbines across the globe, and with 78 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 68 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 21,900 employees are bringing the world sustainable energy solutions to power a bright future.
