

**News release from  
Vestas Mediterranean**

Madrid, 30 September 2016

## **Vestas secures 40 MW order in Brazil**

*Vestas strengthens its position in the Brazilian market with a new order from Gestamp Wind*

Continuing to make inroads into the Brazilian wind market, Vestas has received a firm and unconditional order from long-term partner Gestamp Eólica Brazil S.A. to supply 20 units of the V110-2.0 MW turbine for the 40 MW Pedra Rajada I/II wind parks to be located in Rio Grande do Norte, Brazil.

This new contract reinforces Vestas' strong partnership with Gestamp Wind, with whom it has already signed firm orders for the supply of 193 MW in Brazil and 278 MW worldwide.

The wind turbines will be produced in compliance with the local content rules set by the Brazilian Development Bank (BNDES). The contract includes the supply and installation of the wind turbines as well as a 10-year Active Output Management (AOM) 4000 service agreement based on Vestas' latest smart data and technical capabilities to release the full potential of the wind parks. Turbine delivery is planned for the second quarter of 2017, while commissioning is expected for the third quarter of 2017.

President of Vestas Mediterranean, Marco Graziano, comments, *"Vestas has made a significant effort to expand our presence in Brazil, and today's order confirms we are making good progress. Our customers appreciate these efforts, and we are pleased to see that our determination is paying off now. We are committed to deliver on our promises and continue to meet our customers' needs and expectations".*

Brazil was Vestas' fifth largest market for new orders in 2015. With today's order, Vestas has announced 212 MW in firm and unconditional orders in Brazil in 2016.

**About Vestas**

Vestas is the energy industry's global partner on wind power solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 76 GW of wind turbines in 75 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 63 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 21,700 employees are bringing the world sustainable energy solutions to power a bright future.
