Vestas CEO Ditlev Engel joins International Advisory Panel on Energy

Vestas President and CEO Ditlev Engel has accepted the invitation to join the International Advisory Panel (IAP) on Energy from the Singaporean Ministry of Trade and Industry. Together with top international energy executives and thought leaders, Ditlev Engel will provide advice on key energy issues and policymaking as well as insights and perspectives on developments in the global energy arena to the Singaporean government.

Singapore established the International Advisory Panel (IAP) to gain insights and perspectives from top international energy executives and thought leaders, to help ensure that Singapore's energy policies are relevant and forward looking. The IAP is chaired by Minister of State for Trade and Industry, Mr S. Iswaran, and meets 2-3 times a year. Members are elected for a 2-year period.

Official press release from the Singaporean Ministry of Industry and Trade on the inaugural meeting of the International Advisory Panel on Energy is available at <http://app.mti.gov.sg/>.

Med venlig hilsen
Vestas Wind Systems A/S

Ditlev Engel
Koncernchef (CEO)

About Vestas

With a 23 per cent market share, Vestas is the world's leading supplier of modern energy solutions. We have installed more than 35,500 wind turbines in 63 countries on five continents. And we install an average of one wind turbine every four hours, twenty-four hours a day. In fact, our wind turbines generate more than 60 million MWh of energy a year – or enough electricity to supply millions of households.

Wind power is a competitive, predictable and clean energy source. It has a fast ramp-up and offers the energy independence demanded by some of the world's largest and fastest growing economies. This is why Vestas calls wind power Modern Energy.
