Vestas to deliver 92 V82-1.65 MW wind turbines to Brazil

Vestas has received an order for a total of 92 units of the V82-1.65 MW wind turbine for the Alegria project in Brazil. The order comprises supply of the turbines, a VestasOnline™ Business SCADA system as well as a five-year service agreement.

The order has been placed by New Energy Options (NEO), a company in which the majority of the shares is owned by Multiner S/A. Multiner's goal is to become one of the most important and diversified private-sector power generators in Brazil.

"We are very pleased to receive this order for Brazil which will be the second project that Vestas will supply to the Brazilian market. Brazil has one of the world's best wind energy potentials, reaching 143,000 MW. With a wind energy target of 2,200 MW installed by 2010 and 5,000 MW by 2015, we have very positive expectations for the market," says Juan Araluce, President of Vestas Mediterranean A/S, and continues: "We look forward to working together with New Energy Options and hope our partnership will be extended in the years to come."

The wind power plant will be located in the State of Rio Grande do Norte in the north-eastern part of Brazil, which is an area with one of the best wind regimes in the country with average annual wind speeds exceeding 8.5 m/s.

The wind power plant is estimated to produce 492 GWh per year, which will cover the yearly electricity consumption of approx 194,000 Brazilian households. Furthermore, it will save approx 115,000 tons of CO₂ emission to the atmosphere.

The above order does not affect the Vestas Group's expectations for 2008, cf. Company announcement No. 25/2008 of 8 May 2008.

Any questions in relation to the order may be addressed to Mr Juan Araluce, President of Vestas Mediterranean A/S, telephone +34 93 241 98 00, or to Mr Peter Wenzel Kruse, Senior Vice President of Group Communications at Vestas Wind Systems A/S, telephone +45 9730 0000.

Yours sincerely
Vestas Wind Systems A/S
