#### **Additional information related to deliveries for the USA**

#### **80 units of Vestas V80-1.8 MW turbines for the Evanston project in Wyoming**

As previously announced in Stock Exchange announcement no. 10/2003 of 1 June 2003 from Vestas Wind Systems A/S ("Vestas"), the fully-owned American subsidiary of Vestas, Vestas - American Wind Technology, Inc., has received a large wind turbine order of a total value of approximately mEUR 100.

The order is for the supply of 80 units of the V80-1.8 MW wind turbines including towers and other services to the Evanston, Wyoming Project - located in South-West Wyoming, near the city of Evanston. The project will be the largest wind farm in Wyoming and more than doubles the wind generating capacity in the state.

The order is placed by FPL Energy, LLC, North America's largest developer, owner and operator of wind power plants. FPL Energy, LLC is a major U.S. independent power producer and a subsidiary of FPL Group, Inc. (NYSE: FPL), which is also the parent of Florida Power & Light Company, one of the largest electric utilities in the United States.

The turbines will be delivered during the second half of 2003 and it is the second large order to the United States for the Vestas V80-1.8 MW wind turbine.

*"FPL is an important customer and we look forward to continuing the close co-operation with FPL.",* says Svend Sigaard, Managing Director of Vestas Wind Systems A/S and continues; *"It is positive that FPL has again chosen the V80-1.8 MW turbine, which we see as proof of the competitiveness and confidence in the technology of Vestas North American MW turbines".*

**Additional information related to deliveries for the USA**

**Additional Vestas turbines for the largest wind project in California**

As mentioned in Vestas Wind Systems A/S' Stock Exchange announcement no. 19/2002 of 9 December 2002, Vestas – American Wind Technology, Inc. was awarded a contract from FPL Energy, LLC, for deliveries to the High Winds project. FPL Energy, LLC has now placed additional orders for V80-1.8 MW wind turbines including towers and other services to the High Winds Energy Center project, located in Solano County, California.

The value to Vestas of the additional orders plus the initial order (cf. Stock Exchange announcement no. 19/2002) is in excess of mEUR 110. The turbines have to be delivered before the end of 2003.

*"We are very pleased that FPL Energy, LLC has chosen Vestas as supplier for the 162 MW High Winds project, that will be the largest wind farm in California"* says Svend Sigaard, Managing Director of Vestas Wind Systems A/S.

The above mentioned additional orders do not influence the Vestas Group's expectations for year 2003, cf. Stock Exchange announcement no. 09/2003 of 28 May 2003.

Any questions may be addressed to the Board of Management at Vestas Wind Systems A/S, phone +45 9675 2575.

Kind regards,

**Vestas Wind Systems A/S**

Svend Sigaard  
Managing Director
