About Midsummer

[Midsummer](#) is a leading developer and supplier of advanced solar energy technology solutions for the production and installation of thin film solar panels. Its business offering includes equipment for cost-effective manufacturing of thin film solar cells as well as building-integrated photovoltaic (BIPV) solutions. Midsummer's production process for thin film solar cells has a minimal carbon footprint compared to other production processes for solar modules. Midsummer's [DUO system](#) has taken the position as the most widespread manufacturing tool for flexible CIGS solar cells in the world.

Midsummer develops and markets solar panels directly to end customers from its own production and via contract manufacturers. The [Midsummer Solar Roofs](#) product range [Midsummer SLIM](#), [Midsummer WAVE](#) and [Midsummer BOLD](#) offers customers light, thin and flexible solar panels that result in attractive solar roofs.

Midsummer's technology is based on a rapid process for the production of durable, flexible CIGS solar cells using sputtering of all layers of the solar cell in a sealed vacuum chain. The Company's share (MIDS) is traded on Nasdaq First North Premier Growth Market with G & W Fondkommission as Certified Adviser, phone: +46 (0)8-503 000 50, email: ca@gwkapital.se.
