CEO's comments

The third quarter of the financial year 2021 demonstrated once again our ability to grow sustainably quarter after quarter with increasing gross margin and we are entering the post-pandemic environment in a position of strength. Even though facing the high comparison figures from previous year, group net sales growth was 20% together with excellent improvement in gross margin. All the important indicators supporting strong and sustainable growth are going into right direction; we are constantly winning new customers, the average spend is going upwards, customer satisfaction continues to stay on a high level and the share of sales of own and exclusive products is growing. We continue to support our customers in transitioning to a post-pandemic environment and the fundamentals of our business are constant: everything we do starts and ends with our customers. I am very pleased to report another successful quarter today:

- Group net sales increased by 20.2% to EUR 82.7 million in Q3. The increase was largely due to like-for-like growth in all countries and the increasing number of new customers, together with an increased number of directly operated stores. Like-for-like growth amounted to 11.6% (11.5%).
- Store sales increased by 23.8% to EUR 59.9 million, driven by an increased number of stores and strong like-for-like store sales growth in all countries. Like-for-like store sales growth was 10.7% (4.3%). Store sales growth in the comparison period was negatively impacted by restrictions relating to the COVID-19 pandemic.
- Online sales increased by 15.8% to EUR 19.9 million. Online sales accounted for 24.1% (25.0%) of total net sales. In the comparison period, online sales growth was positively impacted by the channel shift towards online sales due to restrictions relating to the COVID-19 pandemic.
- Net cash flow from operating activities was extremely strong and totaled EUR 10.1 million (EUR 2.2 million).

The Pet Parenting trend has been continuing strong, and the favorable trend in puppy registrations keeps getting stronger. Puppy registrations in Sweden were up again by 16% in June 2021 compared to corresponding month in 2020 and what is most important, the growth in Musti Group's new puppy customers continues stronger than ever. In June 2021, we received an all-time high number of new puppy customers, an increase of 33% compared to the corresponding month previous year. Given the strong underlying market development, we are utilizing the momentum and investing heavily on sales growth to reach out to more new customers and to develop an ecosystem for Pet Parents to further increase attractiveness and customer loyalty. This reflects our strategy and supports the mid- and long-term financial targets, and we are well on track to reach the updated sales and margin targets set in May 2021.

In June 2021 we successfully concluded negotiations with franchisees of all 16 stores operating under franchising agreement in Finland. After the transactions are finished in Q4 2021, all stores in Finland are directly operated. As a result of both strong organic growth and accelerated acquisitions, we have upgraded our estimate of increase in own directly operated stores to 45-55 stores during the financial year. The rapid store expansion, focusing on building a seamless ecosystem for the growing number of customers and strengthening the assortment of own and exclusive products has added costs in a short-term, but will pay back in the longer term.

The Group's adjusted EBITA increased by 13.3% to EUR 7.3 million in Q3. The increase was due to sales growth. Adjusted EBITA margin was 8.8% (9.3%). The comparison period's cost structure was positively impacted by lower working hours in our stores and lower operating costs driven by the COVID-19 pandemic. This year, quarterly adjusted EBITA margin development was in line with periods prior to the COVID-19 pandemic, where Q3 has normally been the quarter with the lowest profitability driven by lower volume and margins. Adjusted EBITA was still negatively impacted by EUR 0.3 million by the low efficiency in Eskilstuna driven by the warehouse consolidation project that was executed in Q1 2021. However, the efficiency has improved as planned and is expected to normalize by the end of Q4. I am extremely pleased with the gross margin development. Gross margin increased to 45.4% (42.6%) as a result of lower share of online sales, more efficient marketing campaigns, favorable product mix and efficient supply chain management. Operating profit increased by 25.6% to EUR 5.3 million.

Adjusted EBITA margin increased to 12.4% in Sweden and 16.3% in Norway. In Finland, adjusted EBITA margin decreased slightly from the comparison period to 21.8%. However, especially in Finland, the comparison period was positively impacted by cost savings in relation to the COVID-19 pandemic, mainly caused by lower working hours. Hence, adjusted EBITA in Q3 2021 was more in line with periods prior to the COVID-19 pandemic.

Our focus remains on making the life of pets and their parents easier, safer and more fun. For the benefit of our customers, business and shareholders, we are determined to continuously improve our performance and do things a bit better every single day. Our personnel prove their expertise and genuine will to serve our customer in the best possible way every day, which I want to sincerely thank them all for.

Market outlook

Musti Group operates in the Nordic pet care market, broadly defined as the sale of pet food, treats, products, services and veterinary care across Finland, Sweden and Norway. The market was estimated to be worth approximately EUR 2.9 billion (in 2019), with Sweden as the largest market, accounting for approximately EUR 1.2 billion, and Finland and Norway estimated to be similar in size, at approximately EUR 0.9 billion and approximately EUR 0.8 billion, respectively.

"Pet Parenting" refers to the tendency of people to treat their pets like family members. As a result of this trend, people are spending more on higher quality and more premium food, as well as a more diverse range of products and services. This underlying trend that drives the long-term structural growth of the pet care market remains robust, shifting spend towards higher quality nutrition, a more diverse range of accessories and wider adoption of services. The COVID-19 pandemic has affected market dynamics since spring 2020 mainly through an increased number of puppies and kittens, in line with historical evidence of developments during economic downturns, and increased demand in online channels.

The pet care market is resilient, underpinned by non-discretionary purchasing behaviour. Non-discretionary categories such as food, cat litter and veterinary services make up approximately 75% of total market spend and are characterised by repeat purchasing behaviour that is consistent through the cycle. Consumers display willingness to sustain spending on non-discretionary pet care purchases even while expenditure on alternative categories has been affected.

These projects have generated additional costs during Q3 FY21.

Basis of preparation and accounting policies

The Group's consolidated interim financial statements are prepared in accordance with the International Financial Reporting Standards (IFRS) as implemented within the EU.

The interim report of 1 October 2020 – 30 June 2021 has been prepared in accordance with the IAS 34 Interim Financial Reporting standard and the accounting principles applied in the interim report are the same as in the financial statement of 2020.

The figures of the interim report have not been audited.

The Group's consolidated financial statements are prepared in euros, which is the company's operating currency and the company's and the Group's reporting currency. The interim report is presented in thousand euros unless otherwise stated.

Critical accounting estimates and judgments

An IFRS-compliant interim report requires the Group's management to exercise judgment and make estimates and assumptions that affect the reported amounts of assets and liabilities and other information such as the amounts of income and expense. Although these estimates are based on the management's best knowledge at the time, it is possible that actual results differ from the estimates used in the interim report.

There have not been any major changes regarding the uncertainty requiring the Group's management to exercise judgment and make estimates and assumptions compared to the financial statement of 2020.

Key accounting considerations related to COVID-19

During October 2020-June 2021 Musti Group received but didn't apply for any financial assistance under governmental scheme. However, the amount of the assistance was not material from a Group perspective. The group also negotiated some rent reductions during the financial period for which the group has not applied the IFRS 16 Covid-19 amendment. The Group's management has assessed COVID-19 impacts by reviewing the carrying values of the balance sheet items, the review did not indicate need for asset impairments.

Events after the reporting period

In a press release 30 June 2021 Musti Group announced that its subsidiary Musti ja Mirri Oy has offered to acquire the businesses of all 16 stores operated under franchising agreements in Finland through an asset purchase agreement. Negotiations with franchisees were successfully concluded in June 2021, and the 16 stores will become directly operated part of Musti Group during Q4 2021. After the transactions are finished, all stores in Finland are directly operated. The total purchase price will amount to approx. EUR 2 million.

On 5 July 2021, Musti Group acquired the shares of a legal entity that operates a pet store in Norway. The acquisition does not significantly impact sales, profitability or the financial position of Musti Group.

Level 1: Quoted unadjusted prices at the balance sheet date in active markets. The market prices are readily and regularly available from an exchange, dealer, broker, market information service system, pricing service or regulatory agency.
