

Virtual Experience Training for flotation

Outotec proudly presents the Virtual Experience Training for flotation processes.

Outotec's Virtual Experience Training provides customers with a fast and effective way to train their personnel already before the production start-up phase or later according to individual customer needs. Virtual Experience Training provides hands-on experience with operations by utilizing an advanced training simulator developed by Outotec. The training consist of basic and advanced modules:

Basic training module

- the theory of minerals processing
- simulator exercises focusing on the basic operations of the equipment and process circuit
- troubleshooting scenarios

Outotec is now accepting requests for Virtual Experience Training for flotation processes. Please contact your local Outotec office for more information.

"By offering this training, we have also strengthened the bond between the operators and the company. I would recommend this training to other companies as well."

Carlos Gil, Plant Manager, Almina

Advanced training module

- targeted at optimizing the process circuit
- additional intelligence tools
- cost and revenue structure of the process circuit
- maximizing recovery and maximizing profit in changing conditions

Outotec develops and provides technology solutions for the sustainable use of Earth's natural resources. As the global leader in minerals and metals processing technology, Outotec has developed over decades several breakthrough technologies. The company also offers innovative solutions for the chemical industry, industrial water treatment and the utilization of alternative energy sources. Outotec shares are listed on the NASDAQ OMX Helsinki.
