

Press release, 22 January 2021

Change in management within Engineering & Digital Services to support growth

As part of the growth agenda of Engineering & Digital Services (EDS), Semcon's CEO, Markus Granlund, is taking over responsibility for the business area while the former business area president, Daniel Rundgren, is focusing on growth and acquisitions within EDS.

In recent years, the business area has implemented measures that have contributed to increased profitability, productivity and efficiency. In addition, there has been an in-depth focus on the digital offerings and the industry mix has broadened.

"Engineering & Digital Services has amazing offerings, employees and customers and is well-positioned for growth. We have great potential as we are now entering a phase where we are focusing even more on accelerating the growth of the business area", says Markus Granlund, CEO and business area president.

Markus Granlund will remain in his position as President and CEO of Semcon, while Daniel Rundgren leaves Group Management due to the change, effective from today. Semcon's other business area, Product Information, is not affected.
