Semcon wins framework agreement with Getinge

Semcon has signed a new three-year framework agreement with Getinge regarding technical consulting services within life science, covering both product and production development.

With more than 35 years of experience in life science, Semcon supports customers in developing user-friendly medical devices, quality-assured pharmaceuticals, and efficient digital information solutions.

“We look forward to continuing to support Getinge in their important work. This new agreement means great opportunities for us at Semcon, especially in Stockholm and Växjö, but also in Gothenburg and Getinge's other sites in Europe. It is inspiring to be able to participate and make a difference in the increasingly important and growing life science sector”, says Anna Nordelöf, Key Account Manager at Semcon.

Semcon and Getinge have collaborated for many years, both with project deliveries and through support from individual experts. Now the collaboration will continue and intensify going forward. The new framework agreement runs over three years and is open to be used by Getinge's other sites in Europe.
