Crypto Games AG takes Backgammon to the metaverse on Concordium blockchain

September 6, 2022 - Switzerland - Crypto Games AG is announcing the development of CryptoGammon, a blockchain-based backgammon, on the Concordium Blockchain.

With Concordium's commitment to confidentiality and accountability, the possibilities of how backgammon could evolve in the metaverse are endless. Players will participate in tournaments and test their skills against people from all over the world in a secure environment provided by Concordium and its ID-framework.

In accordance with Concordium and Crypto Games AG's sustainability efforts, players will also have the opportunity to trade unique NFTs in-game on the net-zero carbon emission NFT marketplace SpaceSeven, as well as compete for prizes in the native Concordium cryptocurrency CCD.

"By harnessing Concordium's pioneering ID layer technology, Crypto Games AG will be able to develop CryptoGammon, a p2p skill-based gambling game, in a responsible, secure, and compliant way, ensuring that players meet age requirements and can otherwise be banned" says Kapil Kumar Chairman of 9HZ.

Backgammon will be the first out of many games that Crypto Games AG will develop in a partnership with [9HZ](#), an ISO 9001:2010 certified leading software development company with more than 1800 launched projects, hundreds of developers with extensive Rust experience, and a state-of-the-art NFT game development division with 65 NFT games app developers and over 650 NFT games.

"CryptoGammon serves as a perfect example that classic games, deeply rooted in history, can join the blockchain space to innovate and develop new opportunities. In the case of CryptoGammon, blockchain makes it possible for you to compete with anyone from anywhere in the world for a prize you agree on. Concordiums ID-Layer provides a safe and transparent platform, ensuring that players meet age requirements and can transact in confidence and trust", says [Lars Seier Christensen](#), Chairman of Concordium Foundation.

Crypto Games AG has been awarded the 'Free and Open Grant' by the Concordium Foundation for the development of **CryptoGammon** on Concordium Blockchain. An ambitious

project that aims to fund projects that support the Concordium Ecosystem.

About Concordium

Concordium is a permissionless layer 1, science-backed blockchain, designed to balance privacy with accountability through its ID layer and the use of Zero-knowledge proofs.

Creating trust with ID is a key to the mass migration of web2 to web3 and beyond.

For DeFi degens, metaverse players, and gamers, it provides a fast, secure, and highly capable platform that makes building and using dApps a simpler, more accessible task. Concordium differs by having the third party verified ID, by offering nearly instantaneous, real finality which hinders roll-back of transactions and offers low transaction fees, stable in FIAT terms and a large throughput.

With leadership from Volvo, IKEA, Credit Suisse, Uber the team is now scaling the chain to its extensive network of the world's biggest enterprises. For more information: concordium.com.
