

## Everfuel Achieves RFNBO Certification – A Major Milestone for Green Hydrogen in Europe

Herning, Denmark, 3 September 2025 – Everfuel is pleased to announce that we have achieved RFNBO certification officially recognising that our hydrogen production facility, HySynergy, produces green hydrogen under the EU's Renewable Fuels of Non-Biological Origin (RFNBO) framework.

Everfuel is now a Certified RFNBO Producer, setting a new benchmark for sustainable energy in Denmark and across Europe.

The certification is the gold standard for green hydrogen under the EU's RED II and RED III directives. It confirms that Everfuel's hydrogen production from HySynergy meets the strict environmental and traceability criteria required to contribute to the EU's binding renewable energy targets. Some key properties associated with Everfuel's RFNBO certification are:

- >99% emissions reduction compared to fossil fuels'
- Certified under ISCC, ensuring full compliance with EU sustainability and GHG reduction criteria
- Strategic alignment with Fit-for-55, RePowerEU, and the Hydrogen Backbone initiative
- New market access in Denmark, Germany, and Northern Europe for certified hydrogen supply
- Enabling RFNBO production combined with opportunity to engage in the power balancing market

"This milestone is a testament to the dedication of our entire team and our partners. RFNBO certification not only validates our ambition of producing green hydrogen at scale — it also opens the door to long-term partnerships in industry and transport. Special thanks to our HySynergy partner and RFNBO customer Crossbridge Energy Fredericia A/S, whose collaboration has been instrumental in reaching this milestone" says Jacob Krogsgaard, CEO and funder of Everfuel.

The certification process, completed through ISCC, reflects Everfuel's commitment to pioneer the green hydrogen industry. Further, it strengthens Everfuel's position as a frontrunner in the European hydrogen transition, especially as Germany and other EU countries ramp up RFNBO obligations in transport and industry from 2026 onward.

Everfuel looks forward to supply Certified Green Hydrogen to customers in Denmark, Germany and Northern Europe

### **About Everfuel | [www.everfuel.com](http://www.everfuel.com)**

Everfuel owns and operates green hydrogen infrastructure and partners with industry to connect the hydrogen value chain and seamlessly provide hydrogen to industry and mobility customers. Our strategy focuses on developing and executing large-scale hydrogen production capacities initially in Denmark to supply green hydrogen to a vast and emerging European market, starting with Germany. Green hydrogen, made from renewable solar and wind power, is a clean energy carrier and key to decarbonising industry and transportation in Europe. We are an ambitious company headquartered in Herning, Denmark, with activities in Denmark, Germany, and The Netherlands. Everfuel is owned by founding investor E.F. Holding, Swiss Life Asset Managers, Hy24, and HyVC (a JV by ITOCHU Corporation & Osaka Gas UK, Ltd., subsidiary of Osaka Gas Co., Ltd.), reflecting comprehensive industrial, financial, and commercial competencies committed to Everfuel's mission of a sustainable future.
