Safello announced one of Sweden's 50 fastest-growing technology companies by Deloitte

Stockholm, 24 November 2022 | Sweden's leading crypto broker [Safello](#) has been listed as Sweden's 11th fastest-growing technology company when Deloitte announced the Sweden Technology Fast 50 top list.

Sweden Technology Fast 50 is a yearly top list by Deloitte that acknowledges the 50 fastest-growing technology companies in Sweden. The ranking is based on revenue growth over the last four years. Safello enters the list for the first time at place 11, with a total increase of 2,697%.

"Safello's growth has accelerated since 2018 when we introduced onboarding with Swish and BankID. Being included in Deloitte's list is proof of our achievement and that we deliver on our growth plan. Despite the recent crypto downturn we recently reached 300,000 customers which is nearly 3% of the total Swedish population. Our goal is to keep innovating at a high pace and continue to be the *safe fellow* of crypto," says Frank Schuil, CEO and co-founder of Safello.

"It is always exciting to see which companies make it into the Sweden Technology Fast 50. As usual, the trends on this year's list reflect shifts we see in society at large – for example, several medtech companies are represented and there is a continued focus on sustainability and greentech. We also see more industries than ever represented among this year's companies, and a range of innovative solutions to help manage problems we face, both as a society and on a personal level," says Ester Sundström, partner and responsible for Deloitte Sweden Technology Fast 50.
