## **Viessmann Refrigeration Solutions introduces a new range of plug-in products**

- **New plug-in cabinets meet new Ecodesign and Energy Labelling Directives of the EU**
- **All plug-in cabinets are available with natural refrigerant R290**
- **Wide selection of cabinets include range of high multideck and semi-vertical cabinets to chiller and freezer islands**

## **New plug in cabinets following new Ecodesign Directive and Energy Labelling Regulation will lower the CO2 footprint**

All new Tecto plug-in products from Viessmann Refrigeration Solutions comply with the Directives, EN2019/2024 and EN2019/2018, that have come into effect from 1st of March 2021.

The target of the Ecodesign Directive is to guide manufacturers to start designing products with reduced energy consumption and that way also reduce the negative environmental impacts of these products all through their life-cycle. 'Ecodesign' means that there will be a greater focus on lifetime energy use and other environmental aspects during the design phase before products are manufactured and brought to market.

The Energy Labelling Regulation requires an energy label to be attached to the product, which helps end users to select energy efficient products more easily. Energy labelling requirements apply from March 1st, 2021 onwards on newly produced equipment. They provide clear and easy-to-understand information on the product energy efficiency, and classifies products from A to G according to their level of efficiency. The label has to be attached to every product.

## **New environmentally friendly plug-in products in Viessmann's Tecto portfolio**

The new high multideck cabinet Tecto MD2 PI offers excellent product visibility with panoramic glass end panels. Three different door options ensure high product visibility, energy efficiency and high hygienic standard for users. Tecto SV4 PI is a new semi-vertical cabinet to be used to present groceries such as dairy and meat products, salads and beverages. Tecto FI2 PI chiller or freezer islands are ideal for high volume, fast moving chilled and frozen food.

---

All in all the wide selection of cabinet variants ensure plenty of options for store layout planning and point-of-sale promotions. With the unified cabinet design the entire store has a harmonious outlook creating a pleasant shopping experience with sustainability.

“With the new plug-in products we are making one step more towards less energy consumption and preserving our planet for future generations. It is a great way to help our customers to make the right choice for refrigeration products in their markets” states Frank Winters, CEO of Viessmann Refrigeration Solutions, about the new portfolio of Tecto plug-in cabinets.

### **About Viessmann:**

The Viessmann Group is one of the leading international manufacturers of heating, industrial, and refrigeration solutions. This family enterprise was founded in 1917, has 12,300 employees, and the group’s turnover amounts to €2.65 billion.

Viessmann Refrigeration Solutions is one of the leading European manufacturers of commercial refrigeration and clean room solutions, renowned for their energy efficiency, sustainability, ease of use and maintenance. Viessmann’s refrigeration product and service portfolio includes refrigerated cabinets, refrigeration systems, cold and clean room solutions, accessories and related services. Viessmann Refrigeration Solutions employs nearly 1,500 refrigeration professionals in Europe. The products are manufactured at Viessmann factories in Germany and Finland and are represented by local sales offices in 18 countries, backed up by an extensive network of partner companies.
