
ADLER Lodge Hotel offers culinary delights in front of the breathtaking Dolomite mountains

- **TectoCell cold and freezer rooms meet highest hygienic requirements in ADLER Lodge Hotel**
- **Jointless installation of cold room elements supports energy efficiency**
- **Cold and freezer rooms are easy to clean and very reliable in operation - two important factors in running a catering business successfully**

A clearing in the forest. A spectacular view of the kings of the Dolomites, the mighty Sciliar, Sassolungo, the Geisler peaks, and the legendary Catinaccio: ADLER Lodge Ritten is located near Bolzano in the midst of unique natural environments and offers its guests pure peace and relaxation, combined with culinary highlights.

Reliable refrigeration technology plays a considerable role in the success of the numerous culinary delights. Since spring 2019, a total of 8 cold and freezer rooms from Viessmann have been ensuring perfect refrigeration. All of them are TectoCell Standard Plus models, as with this model the highest hygienic requirements as well as energy efficiency can be met.

"We have in total eight cold rooms from Viessmann, which are all running well. They are easy to operate, easy to clean, and offer enough space to work professionally. We would choose the same products again at any time" explains Hannes Pignater, Head Chef in ADLER Lodge Ritten, happily.

Long term relationship and transparent communication are the key to success

The project was realized together with the 'Cool' department of Niederbacher GmbH, one of the leading refrigeration specialist companies in the field of refrigeration and air conditioning technology for the catering sector.

Viessmann and Niederbacher GmbH already have a long partnership. A well-rehearsed team that works together smoothly and with transparent and open communication above all, ensures that the customer's wishes and technical design can be realized. Ultimately, everything is being delivered on schedule.

Reliable and safe operation to ensure highest food quality

The refrigeration specialist based in Kaltern, Caldaro, also opted for Viessmann cold rooms for this project, as the products are extremely solid and durable. The jointless arrangement of the cold room elements and their excellent workmanship are highly

convincing. These features make the Viessmann cold room a high-quality product that Niederbacher GmbH is very happy to offer to its customers.

Easy operation and reliability of products are critical for food service businesses to succeed

The management of the ADLER Lodge Ritten are more than satisfied with the implementation of this cold room project. The cold rooms are highly reliable and easy to clean: two important factors for a smoothly running catering operation that promises its guests a culinary treat. Therefore, the hotel has several cold rooms of different sizes, all equipped with temperature monitoring to be able to react quickly to possible technical issues if needed. Nothing of a sort can be reported as no problems or defects have been detected so far - which once again speaks for the quality of Viessmann cold rooms.

About Niederbacher GmbH:

Niederbacher GmbH based in Kaltern, Italy, is South Tyrol's leading company in the field of catering equipment and furnishings and nowadays employs over 50 workers. The 'Cool' department, one of the different business areas of the company, consists of a young qualified team with years of experience in the industry. Niederbacher provides refrigeration and air-conditioning technology not only in the catering sector but also in other areas where refrigeration plays a decisive role. Individual planning, tailor-made solutions, installation work, and first-class customer service are all part of the refrigeration specialist company's portfolio. The central focus for the customer at Niederbacher is always on costs and energy savings through modern technologies and premium brands.

About Viessmann:

The Viessmann Group is one of the leading international manufacturers of heating, industrial, and refrigeration solutions. This family enterprise was founded in 1917, has 12,750 employees, and the group's turnover amounts to €2.8 billion.

Viessmann Refrigeration Solutions is one of the leading European manufacturers of commercial refrigeration and clean room solutions, renowned for their energy efficiency, sustainability, ease of use and maintenance. Viessmann's refrigeration product and service portfolio includes refrigerated cabinets, refrigeration systems, cold and clean room solutions, accessories and related services. Viessmann Refrigeration Solutions employs nearly 1,500 refrigeration professionals in Europe. The products are manufactured at Viessmann factories in Germany and Finland and are represented by local sales offices in 18 countries, backed up by an extensive network of partner companies.
