

PRESS RELEASE

May 18, 2021

Polymer Factory Sweden AB expands team through hiring of new Product Managers

Meeting one of the Company's objectives for 2021, Polymer Factory now announces the hiring of two Product Managers for its segments Analytical Materials and Dendritic Gels respectively.

Polymer Factory today announces the hiring of two new Product Managers to join the team. Starting September 1, 2021, Jens Sommertune will be manager of the segment Analytical Materials, including the patented platform SpheriCal®. Starting February 1, 2022, Veronica Lopez will be manager of the segment Dendritic Gels.

Prior to joining Polymer Factory, Jens Sommertune was most recently Application Specialist and Sales Manager for Confocal Raman Microscopy at RISE. Sommertune has a PhD from KTH Royal Institute of Technology, department of Fiber and Polymer technology.

Prior to joining Polymer Factory, Veronica Lopez was most recently Senior Research Associate at RISE. Lopez has a PhD from KTH Royal Institute of Technology, department of Fiber and Polymer technology.

CEO Elin Mignérus:

"We are very happy to have signed with two great persons, who both have backgrounds and expertise suitable for the respective Product Manager roles. With these recruitments, we will have strengthened the team in order to further penetrate the markets within each segment, as a part of scaling up our business. Polymer Factory is now building for the future, and we look forward to continue our journey together with these new team members."

About Polymer Factory

Polymer Factory was founded in 2006 at KTH Royal Institute of Technology and its Board of Directors have been essential in driving dendritic nanotechnology research to commercialization for almost 15 years – expertise that has been transferred to the Company's products. Emerging from many years of cutting-edge research within the field, Polymer Factory today has, in the Company's assessment, the world's largest product portfolio of dendritic materials with customers ranging from Big Pharma, MedTech and BioTech companies, to research-intensive institutes and academic research groups. Polymer Factory has also used the Company's vast knowledge and expertise to develop a patented calibration technology, named SpheriCal®, designed for Mass Spectrometry instruments.

Polymer Factory (publ) is a leading global provider and producer of dendritic materials, with customers ranging from Big Pharma, MedTech and BioTech companies, to research-intensive institutes and academic research groups. The Company's dendritic materials act as smart delivery systems that enhance the effects of the substances they carry, e.g., a vaccine or an anticancer drug. They have also shown great promise in diagnostics, tissue engineering and in the development of vaccines. In addition, Polymer Factory has used the Company's vast knowledge and expertise to develop a patented calibration technology, named SpheriCal®, designed for Mass Spectrometry instruments. The Company's dendritic nanotechnologies have the potential to accelerate innovation in technologically demanding sectors, such as MedTech and BioTech. Learn more at www.polymerfactory.com.
