AddSecure and Unity Plan partner to deliver certified TPMS for safer, smarter fleets

AddSecure partners with Unity Plan to offer certified TPMS in FleetVision, helping fleets reduce fuel consumption, avoid tire-related risks, and ensure safety and compliance.

[AddSecure](#), a leading provider of secure IoT connectivity and end-to-end solutions, has announced a strategic partnership with Unity Plan, a specialist in certified tire pressure monitoring system (TPMS) solutions for commercial vehicles.

This partnership enables AddSecure to integrate Unity Plan's certified TPMS technology into its FleetVision offering, providing customers with a fully compliant and reliable tire pressure monitoring solution that enhances safety, reduces operating costs, and supports sustainability goals. It is one of many strategic initiatives and partnerships through which AddSecure expands its ecosystem to incorporate data from third-party solutions—delivering valuable, data-driven insights to optimize fleet operations.

“Unity Plan brings an advanced TPMS solution that complements our mission to improve fleet safety and efficiency through secure, connected technologies,” said Claes Ödman, President of Smart Transport at AddSecure. “Together, we’re helping our customers meet growing regulatory requirements while reducing risk and improving performance on the road.”

Unity Plan's TPMS solution is fully certified in accordance with EU regulations, including UNECE R141, ensuring compliance and peace of mind for fleet operators across Europe. By combining this with AddSecure's advanced telematics and real-time data analytics, fleets can proactively detect underinflation, prevent breakdowns, and extend tire life—all within a single, integrated platform.

“We are proud to collaborate with AddSecure to bring our certified TPMS technology to more fleets across Europe,” said Sébastien Lemoine, Founder, Unity Plan. “Our shared vision is to empower fleet managers with actionable insights that make every journey safer and more efficient.”

This new capability will be available to AddSecure customers through the FleetVision platform, with seamless integration into existing workflows and reporting dashboards.

About AddSecure

[AddSecure](#) is a leading European provider of secure IoT connectivity and end-to-end solutions. We help customers optimize their operations, drive business value, and secure vital functions.

By combining connected, data-driven, and sensor-based solutions with best-in-class expertise, we meet our customers' needs regardless of industry. We provide both managed services and connect any device in need of secure communications and data transfer. Imagination is the only limit.

Our secure IoT solutions are used within the areas of buildings, alarms, transportation and logistics, personal safety and security, health care, construction, municipalities, schools, rescue services, power grids, and more.

AddSecure's headquarters is in Stockholm, Sweden. Our main market is Europe, yet we serve customers worldwide. With over 1,000 employees, we help make the world safer, smarter, and more sustainable.

About Unity Plan

Unity Plan is a technology provider specializing in advanced tire pressure monitoring systems (TPMS) designed specifically for the needs of commercial vehicle fleets. With a strong focus on safety, regulatory compliance, and technical excellence, Unity Plan delivers certified solutions that meet stringent industry standards, including UNECE Regulation R141. Unity Plan's system is fully compatible with a wide range of commercial vehicles, including trucks, trailers, buses and specialty equipment. Its flexible architecture allows for seamless integration into third-party telematics platforms, such as AddSecure FleetVision, making it a natural partner for connected fleet ecosystems.
