AddSecure achieves Group-wide ISO certification across Quality, Environment, and Information Security

This achievement marks a significant milestone in AddSecure's commitment to the highest global standards of security, resilience, and quality across its operations.

[AddSecure](#), a leading European provider of secure IoT connectivity and end-to-end solutions, today announced that the scope of its ISO certifications has been expanded to include the Smart Mobility business unit, as well as the acquired companies GroupTalk and Insert IT. This milestone means that the entire AddSecure Group is now certified for ISO 9001 (Quality), ISO 14001 (Environmental Management), and ISO 27001 (Information Security).

ISO certifications are globally recognised standards that demonstrate AddSecure's commitment to delivering high-quality, secure, and sustainable solutions. These certifications strengthen trust with customers, partners, and stakeholders while supporting the company's strategic objectives and growth ambitions.

"Achieving Group-wide ISO certification is a significant accomplishment for AddSecure. It reflects our dedication to quality, security, and sustainability across all business units and markets. This milestone would not have been possible without the hard work and collaboration of our teams," said COO Krister Tånneryd.

Ongoing ISO efforts

AddSecure is a fast-growing business. Since its establishment in 2015, the company has acquired 24 businesses and maintains a firm focus on further expansion. Achieving full ISO certification of the entire Group's operations is a key strategic priority. This effort will continue as AddSecure acquires and integrates new companies into the Group. In addition, AddSecure will undergo re-certification audits in 2026, ensuring continued compliance and improvement across all three standards.

More information about the certifications

ISO 27001 (Information Security Management): This certification assures that AddSecure has implemented robust security measures to protect sensitive data, solidifying the company's position as a trusted provider of secure critical communications platforms and IoT solutions.

ISO 14001 (Environmental Management): This certification strengthens AddSecure's ability to meet customer expectations, comply with regulations, and deliver sustainable IoT solutions across all business units and markets.

ISO 9001 (Quality Management System): This certification demonstrates AddSecure's dedication to providing high-quality IoT solutions and services that meet customer requirements and promote customer satisfaction.

About the International Organization for Standardization (ISO)

[The International Organization for Standardization \(ISO\)](#) is an independent, non-governmental, international body that develops standards to ensure the quality, safety, and efficiency of products, services, and systems.

About AddSecure

[AddSecure](#) is a leading European provider of secure IoT connectivity and end-to-end solutions. We help customers optimize their operations, drive business value, and secure vital functions.

By combining connected, data-driven, and sensor-based solutions with best-in-class expertise, we meet our customers' needs regardless of industry. We provide both managed services and connect any device in need of secure communications and data transfer. Imagination is the only limit.

Our secure IoT solutions are used within the areas of buildings, alarms, transportation and logistics, personal safety and security, health care, construction, municipalities, schools, rescue services, power grids, and more.

AddSecure's headquarters is in Stockholm, Sweden. Our main market is Europe, yet we serve customers worldwide. With over 1,000 employees, we help make the world safer, smarter, and more sustainable.

AddSecure is majority-owned by Funds, managed by [Castik Capital](#), a European private equity fund with a long-term approach to value creation.
