

15 April 2026

AddSecure to showcase its latest advancements in security solutions at The Security Event 2026

The company's cutting-edge solutions help organisations strengthen security, improve connectivity, and navigate the transition away from legacy networks.

[AddSecure](#), a leading European provider of secure IoT connectivity and end-to-end solutions, will present its latest security solutions at The Security Event 2026, Europe's premier commercial, enterprise, and domestic security event, taking place from 28-30 April, at the NEC Birmingham. The event will provide a platform for AddSecure to demonstrate how its cutting-edge solutions are helping businesses adapt to evolving connectivity demands and the transition away from legacy networks.

"The Security Event is a great opportunity to connect with customers and partners. We'll be showcasing our Next Generation Portfolio, push-to-talk communications, an IoT solution and launching a brand-new signalling solution. Much of the conversation will focus on how these technologies support wider system strategies as legacy networks are retired and expectations around resilience, connectivity and security continue to increase," said Chris Wimshurst, Director of Sales, AddSecure UK.

Live demonstrations of Next Generation Portfolio

Attendees can experience AddSecure's Next Generation Portfolio (NGP) of fire and security alarm signalling solutions, which are third-party certified and designed for reliability. The live demonstrations will highlight the ease of install, including the OLED display functionality and the platform's 99.99% uptime, ensuring dependable alarm signal transmission.

Smarter communication with push-to-talk

AddSecure will also demonstrate its push-to-talk (PTT) solution, integrated with PC Dispatch and IoT solutions. This technology converts real-time alerts into instant team communication, empowering the right people to act faster, safer and smarter.

Further highlights include:

- **UltraSync portal and apps** – enabling installers to remotely access systems for diagnostics, maintenance, and programming

- **New signalling solution launch** – powered by AddSecure’s resilient platform with 99.99% uptime

Meet the experts

AddSecure’s team will be available at **stand 5/F105** throughout the event to discuss how its solutions can support organisations in strengthening security, improving connectivity, and future-proofing their operations.
