

Eltel to build grid connections for Hyperco's Data Center – contract value EUR 16 million

Eltel has been awarded a contract to build grid connections for Hyperco's new Data Center in Kouvola, Finland. The contract includes turnkey delivery of a 110 kV substation and cabling from Hyperco's Data Center site to Fingrid's substation. The contract value is estimated to EUR 16 million.

The contract negotiations and network connection discussions progressed with excellent cooperation between the parties, resulting in an efficient and cost-effective solution that fulfills the customer's needs. The construction work is set to begin in summer 2025, with Eltel's share of the work planned for completion in 2026.

"In our Data Center offerings we combine Eltel competences from Power and Communications. By doing so we provide comprehensive and efficient life-cycle services to our Data Center customers, both on the inside and the outside", says Juha Luusua, Managing Director for Eltel Finland.

"We have been very happy with the collaboration with Eltel so far. Getting grid connection built on time is critical for us and Eltel is delivering well. Whenever possible, Hyperco seeks to use local Finnish vendors in its projects and considers it very important to develop the local Data Center ecosystem", comments Timo Pohjanpalo, Hyperco's co-founder and CFO.

Eltel is a member of the Finnish Data Center Association (FDCA). In the Data Center market, Eltel offers lifecycle services, including the design, construction, and maintenance of energy-efficient infrastructure. The company's solutions integrate renewable energy and high-capacity communication networks, ensuring reliability and sustainability. With operations across the Nordic countries, Eltel's 24/7 service capability and geographical reach ensure that Data Centers remain consistently connected and powered.
