

TerraFame strengthens its commercial organisation

TerraFame has appointed Mr. Sander de Leeuw as Chief Commercial Officer (CCO), with the objective of driving sustainable growth of TerraFame's commercial operations. De Leeuw will report to Seppo Voutilainen, CEO of TerraFame.

"Sander has extensive experience and a solid track record in the mining and metals business, spanning over 30 years. Under his commercial leadership, our main objective is to diversify and strengthen our battery materials business portfolio. I warmly welcome Sander to the TerraFame team", says Seppo Voutilainen, CEO of TerraFame.

Sander de Leeuw is a Dutch national and has already started his work at TerraFame.

TerraFame enhances low-carbon mobility by delivering responsibly produced battery chemicals to the global battery industry. One of the world's largest production lines for chemicals used in electric vehicle batteries is located on TerraFame's industrial site. The plant is capable of producing nickel sulphate for around 1 million EVs per year. The carbon footprint of the nickel sulphate produced by TerraFame is among the smallest in the industry.

TerraFame's integrated, unique and energy-efficient production process from the mine to battery chemicals is located on a single industrial site. It provides customers with a transparent, traceable and truly European battery chemical supply chain.

TerraFame Ltd was founded in 2015. Its net sales in 2024 were EUR 544.5 million. Around 2,000 people work on its industrial site, approximately 1,200 of whom are employees of partner companies.
