

Foxway brings new-device confidence to renewed tech across the Nordics

Foxway - known for its circular tech solutions and refurbished devices - is placing an even stronger focus on its premium brand, Teqcycle. This includes launching new collaborations and services designed to add greater value for customers. With Teqcycle, Foxway makes it easier to choose refurbished devices without compromising on performance, reliability, or service quality.

Built to remove barriers to choosing used over new, Teqcycle products deliver premium renewed devices that meet high-quality expectations, helping extend the life of existing tech and reduce the need for new production. Today, Teqcycle is offered through close to 1,000 partners across the Nordics and key European markets, reflecting strong market trust and broad adoption across enterprise and retail channels.

As a key upgrade to its Teqcycle offering, Foxway now introduces Onsite Warranty Service as an add-on across Denmark, Norway, Sweden, and Finland, delivered in partnership with Onitio, the certified service provider for Lenovo and HP in the region.

“At Onitio, we see circularity as a key pillar of modern IT procurement. Our collaboration with Foxway allows us to combine high-quality renewed devices with strong commercial and service models, giving customers a credible, sustainable alternative to buying new. Together, we’re making circular tech both practical and scalable.” says Kim Pedersen, Commercial Director, Onitio.

The service delivers onsite support from certified technicians, consistent service levels across borders, and a warranty experience aligned with new-device standards. As a result, renewed devices feel closer than ever to new – giving customers across the Nordics faster response times, high-quality local support, and the same dependable experience that defines Teqcycle premium devices.

“Access to renewed devices is becoming increasingly important as supply constraints, longer lead times, and ongoing uncertainty continue to affect new hardware availability,” said Mathias Egelund, Head of Teqcycle at Foxway. “But availability alone is not enough. To help users confidently choose renewed, we must offer the same confidence they expect from new products. Onsite warranty is a critical step in ensuring renewed devices offer the same confidence as new products – and in making renewed a stronger option for a more sustainable future.”

With this new onsite warranty service, Foxway removes one of the last remaining obstacles to large-scale adoption of renewed tech across enterprise and retail environments. With Teqcycle, users get renewed premium tech with new-product confidence.

About Teqcycle

Teqcycle is a premium renewed device brand from Foxway, a leading circular tech provider. Designed to meet enterprise standards, Teqcycle delivers consistently high-quality devices with reliable performance while extending product lifecycles and reducing environmental impact. The brand provides more sustainable tech – without compromise.
