

Wyld Networks: Update on Pilot Order for DSS (Drone Satellite System)

Update on Pilot Order for DSS (Drone Satellite System)

Wyld Networks AB (publ) today announces that the Ukrainian drone manufacturer previously referenced in the company's communications, visited Wyld Networks and OKT Technology in Sweden last week for a demonstration of the DSS (Drone Satellite System).

The demonstration was successfully completed, and the system performed in accordance with expectations. The visit represents an important milestone in the ongoing evaluation process and has led to the next phase of the collaboration.

The next phase will involve the delivery of a number of DSS units to Ukraine for testing and evaluation in the operational environment for which the system is intended. The purpose is to verify functionality, performance, and usability under real-world conditions.

The company views the continued progress positively and will provide further updates as the evaluation advances.
