Scania publishes Annual and Sustainability Report 2018

2018 was another year of strong operational performance and a continued focus on contributing to a sustainable future in the ecosystem of transport and logistics. Total vehicle deliveries and service sales reached all-time high levels and Scania's net sales rose to a record level.

In 2018, Scania combined continued growth with taking further steps to drive the shift towards a sustainable transport system. Scania's President and CEO Henrik Henriksson says, "Sustainability is no longer a choice for companies to opt in or out of. It is something we must deliver on to stay relevant. At Scania we have transformed our company's entire purpose, to becoming a leader in the shift towards a sustainable transport system. Our customers require it of us, and their customer ask it of them."

The 2018 edition of Scania's Annual and Sustainability Report takes significant steps in outlining the journey that Scania is taking towards a sustainable transport system. It is the company's fourth combined annual and sustainability report detailing its financial, social and environmental performance.

Scania is a world-leading provider of transport solutions. Together with our partners and customers we are driving the shift towards a sustainable transport system. In 2018, we delivered 88,000 trucks, 8,500 buses as well as 12,800 industrial and marine engines to our customers. Net sales totalled to over SEK 137 billion, of which about 20 percent were services-related. Founded in 1891, Scania now operates in more than 100 countries and employs some 52,000 people. Research and development are concentrated in Sweden, with branches in Brazil and India. Production takes place in Europe, Latin America and Asia, with regional production centres in Africa, Asia and Eurasia. Scania is part of TRATON SE. For more information visit: www.scania.com.
