

Press Release LightLab Sweden AB (publ) 2015-04-29

LightLab Sweden AB and Wallenius Water AB have initiated negotiations regarding enhanced cooperation

Lightlab and Wallenius Water have signed a Letter-of-Intent. Negotiations regarding an enhanced cooperation have been initiated and a due diligence process has begun.

Lightlab has on several occasions from 4 December 2014 and during the first quarter of 2015 informed about the ongoing project for development and performance evaluation of prototype lamps for the UV area, which is conducted in cooperation with Wallenius Water AB. Initial technical measurement results are now present. These show a commercial potential for UVC lamps for purification of air and liquids, based on LightLab's EEE Light® technology.

LightLab and Wallenius Water have therefore discussed a possible continued cooperation, which now has led to the signing of this Letter-of-Intent.
