BPC secures orders from an Austrian engineering company

BPC Instruments AB (“BPC” or the “Company”), has received three consecutive purchase orders from an Austrian company for supporting the technology and business development in transforming waste into biomethane. The comprehensive package includes the delivery of a system of the newly released BioReactor Simulators (BRS) III, one first-generation BRS, multiple units of BPC® Bioreactors CSTR-5G, and BPC® Go, amounting to a total order value exceeding 92,000 Euros. The revenue generated from these orders is anticipated to be included in the fourth quarter of this year.

CEO Dr. Jing Liu comments:

“During the European Biomethane Week hosted in late October, we noticed an increased awareness of the pivotal role of feedstock quality control for biogas/biomethane production. Beyond optimizing feedstock, the critical aspects of process development and optimization also play a key role in cost-efficient biomethane production, presenting immense potential to transform waste into energy. BPC's specialized products, like BRS and BPC® Bioreactors, designed for replicating continuously fed biogas production processes, serve as invaluable tools for scientists and process engineers. I'm particularly proud to see that our upgraded instruments – such as BRS III – are continuously gaining more interest and I look forward to our coming product releases in 2024.

About BPC Instruments AB

BPC Instruments is a global Swedish-based pioneering technology company developing and offering analytical instruments enabling more efficient, reliable, and higher quality research and analysis for industries in renewable bioenergy and environmental biotechnology. The result is not only higher accuracy and precision but also a significant reduction in time consumption and labor requirements for performing analysis. BPC Instruments' innovative products offer high-quality hardware and software based on deep knowledge and experience of target applications. The solutions are the first of their kind, making the company a pioneer in its field. Today, BPC Instruments exports to nearly 70 countries around the world. BPC is listed on the Spotlight Stock Market in Sweden. For more information, please visit BPC's webpage: www.bpcinstruments.com
