

BPC Instruments launches consultation and training service to strengthen customer value

PRESS RELEASE
2025-09-10

BPC Instruments AB (publ) announces the launch of a new customised training and consultation service, designed to help customers make the most of their analytical instruments.

The new service offering provides tailored training sessions, delivered either online or on-site, adapted to the specific needs and applications of each client. Backed by BPC's extensive in-house expertise, the program covers a wide range of topics, from instrument operation and maintenance to data analysis and application-specific workflows. The training aims to equip users with the knowledge and confidence to maximise accuracy, efficiency, and reproducibility in their measurements.

In addition to training, BPC's specialists will provide consultation services to support customers in method development, process optimisation, and the use of analytical results in decision-making. The initiative reflects BPC's focus on long-term customer relationships and its contribution to improving standards and practices in biogas and biodegradability testing.

"Our instruments are designed to deliver high precision and reliability, but their true value is realised when customers feel fully confident in applying them to their specific challenges," says Dr. Jing Liu, CEO of BPC Instruments. "With our customised training and consultation services, we ensure that users operate the systems effectively and gain knowledge that strengthens their research and industrial applications."

About BPC Instruments AB

BPC Instruments is a global Swedish-based pioneering technology company developing and offering analytical instruments enabling more efficient, reliable, and higher quality research and analysis for industries in renewable bioenergy and environmental biotechnology. The result is not only higher accuracy and precision, but also a significant reduction in time consumption and labor requirement for performing analysis. BPC Instruments' innovative products offer high-quality hardware and software based on deep knowledge and experience of target applications. The solutions are the first of their kind, making the company a pioneer in its field. Today, BPC Instruments exports to nearly 80 countries around the world. BPC is listed on the Spotlight Stock Market in Sweden. For more information, please visit BPC's webpage: www.bpcinstruments.com
