

BPC Instruments launches BPC Connect – a smart hub for the BPC Go platform

PRESS RELEASE
2026-03-17

BPC Instruments AB (publ) today launches BPC Connect, a new hub designed to work seamlessly with BPC Go and BPC DAQ. Following the launch of the DAQ in February, BPC Connect marks the next step in the development of the Go platform. It gives users a simple and wireless way to connect multiple BPC Go units within one set-up. The hub can connect up to six BPC Go units and enables integration of BPC DAQ devices within the same system. This improves operational overview and streamlines day-to-day lab work in both research and industrial environments.

BPC® Go has gained growing commercial adoption since its launch in 2022, providing high-precision gas volume and flow measurement with structured data handling for reporting and decision-making. BPC® Go is often purchased as part of multi-unit set-ups, with customers adding additional units as capacity and testing needs increase. BPC® Connect builds on this workflow by linking up to six BPC® Go units into one connected system. Users get clearer oversight, more consistent workflows, and a cleaner way to manage multi-unit set-ups. Together, BPC® DAQ and BPC® Connect strengthen the BPC® Go platform offering for both existing and new customers who require scalable multi-unit monitoring.

- *After introducing BPC® DAQ to bring structured logging of process parameters into the BPC® Go workflow, we now take the next step with BPC® Connect. It is built for users who run several BPC® Go and DAQ units in parallel and want a simpler, more connected way to manage their set-ups. The result is a stronger platform for both research and industrial work, says Dr. Jing Liu, CEO of BPC Instruments.*

**Availability**

BPC® Connect is available for order today through BPC Instruments and authorised partners. For more information about BPC® Connect, please visit the product page at bpcinstruments.com/bpc_products/bpc-connect/ or contact BPC's sales team at sales@bpcinstruments.com
