Comments by the CEO

2023 presented a unique set of challenges, ranging from geopolitical instability, inflationary pressures and related monetary policies, as well as sluggish and uneven global growth. These challenges have translated to a certain extent to the private equity industry, with tighter capital structures, lower acquisition activity and more difficult exit paths.

While NAXS experienced a 1.5% contraction of the NAV/share during Q4 2023, the NAV/share nevertheless increased by 0.5% during the year (including the dividend paid in April).

The lower level of private equity activity was reflected in NAXS's portfolio, where underlying funds acquired 7 new portfolio companies and signed or closed 4 new exits during the financial year.

NAXS made 1 new commitment and 2 co-investments during 2023: a 1.5 MEUR commitment to Celero Fund (E) AB with a 5.7 MSEK co-investment alongside the fund into Reledo AB, a newly established platform within the facility management industry, and a 1 MUSD co-investment alongside JAB Holding into Panera Brands, a pioneer of the fast casual dining the United States.

In April, NAXS paid a dividend of SEK 3.75/share for FY 2022. The Company has now distributed a cumulative SEK 19.88/share over the last 5 years to its shareholders through dividends and share repurchases.

<i>Financial assets measured at fair value via the income statement</i>

	56,533	-	657,498	714,031

Disclosure of fair value measurement by level in the following fair value hierarchy:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – Observable data for the asset or liabilities other than quoted prices included in tier 1, either directly (i.e. as price quotations) or indirectly (i.e. derived from price quotations).

Level 3 – Data for the asset or liability that is not based on observable market data (i.e. unobservable data).

NAXS's private equity fund investments are classified in Level 3. The Company's specific valuation techniques and critical estimates are reported under accounting policies. In level 3, unlisted units in investment funds are reported. The company's holdings in unlisted investment funds (so-called Private equity funds). The funds are valued using an alternative valuation method for which observable input data is not available. For private equity funds, valuation is based on rates and unit values received

from the fund manager. The valuation follows accepted valuation principles for calculating fair values. The fair value is calculated by the underlying assets being market-valued and priced by the fund administrator. The funds follow the IPEV Valuation Guidelines when valuing their holdings. The International Private Equity and Venture Capital Valuation (IPEV) Guidelines set out recommendations, intended to represent current best practice, on the valuation of Private Capital Investments. If NAXS assesses that the fund administrator's valuation has not sufficiently taken into account factors that affect the value of the underlying holdings or if the valuation made is deemed to deviate significantly from the accounting principles for valuation at fair value, an adjustment is made to the value.

For those instruments in the balance sheet that are not measured at fair value, NAXS believe that the carrying amount is a reasonable approximation to fair value for these instruments.

Definitions and Alternative performance measures

NAXS applies the guidelines issued by the European Securities and Markets Authority (ESMA) for alternative key ratios. Alternative key figures are financial measures of historical or future earnings trend, financial position, financial results, or cash flows that are not defined or specified in the applicable rules for financial reporting.

Alternative key ratios are stated when, in their context, they provide clearer or more in-depth information than the measures defined in applicable financial reporting rules. The alternative key figures

are derived from the consolidated financial statements. Alternative key ratios are stated when, in their context, they supplement the measures defined in IFRS. The starting point for the provided alternative key figures is that they are used by management to assess the financial development and are thus considered to provide valuable information to analysts and other stakeholders. NAXS regularly uses alternative key ratios as a complement to those key ratios that generally constitute good accounting practice.
