

NOMOS GLASHÜTTE

Club Sport neomatik Worldtimer from NOMOS Glashütte comes in six special editions with unique color combinations, each limited to 175 pieces.

WATCHES AND WONDERS 2025

The beauty of the world on the wrist

With Club Sport neomatik Worldtimer, NOMOS Glashütte is launching a sporty and elegant worldtime watch for the first time. In doing so, the watchmaking company is setting trends once again—by presenting six colorful limited editions that inspire longing for the most beautiful landscapes in the world

GLASHÜTTE/GENEVA, APRIL 1, 2025. Volcano, Jungle, Canyon, Glacier, Magma, and Dune: The names of these special editions of Club Sport neomatik Worldtimer from NOMOS Glashütte will remind watch enthusiasts of their favorite places to visit and dream travel destinations. Each colorway, limited to 175 pieces, represents one of the most beautiful landscapes found on earth. These limited editions playfully complement the standard versions of Club Sport neomatik Worldtimer in blue and silver.

These watches will be launched by NOMOS Glashütte at this year's Watches and Wonders fair in Geneva, Switzerland. Whether working with colleagues in different time zones, calling family around the world, or traveling to far-flung destinations: Club Sport neomatik Worldtimer is the ideal watch for well-connected and cosmopolitan people.

NOMOS GLASHÜTTE

The new automatic caliber DUW 3202 from the company's own manufacture is the heart of this new release; a worldtime movement in which the additional function has been fully integrated into the neomatik caliber. At just 4.8 millimeters in height, it is thinner than a standard passport. With a total height of just 9.9 millimeters, this watch model is the slimmest automatic worldtimer to date. The case, which is water resistant to 10 atm, makes the watch a robust companion in all situations and gives it the straightforward elegance that is characteristic of NOMOS Glashütte.

Come and visit us at Watches and Wonders in Geneva from April 1 in Hall 2, La Mezzanine or get in touch by email; we are always happy to hear from you.

Yours sincerely,
Ines Hatzmannsberger

The dial color of this limited-edition release from NOMOS Glashütte, Club Sport neomatik Worldtimer Volcano, is reminiscent of volcanic rock. It can also symbolize the power of a pulsating metropolis.

The new Worldtimer from NOMOS Glashütte in a limited edition. The sub-dial of Club Sport neomatik Worldtime Glacier shows the home time with a day/night indicator.

In all six limited editions of Club Sport neomatik Worldtimer, the home time subdial is divided into two colors to highlight day and night. Shown here: Canyon.

Club Sport neomatik Worldtimer from NOMOS Glashütte. The sapphire crystal case back reveals the new caliber DUW 3202. The world time complication is fully integrated into the neomatik caliber. With a height of only 4.8 millimeters, it is thinner than a passport. Shown here: Jungle.
