

Alleima reconfirmed with EcoVadis gold medal for sustainability performance

Once again Alleima has been awarded with the gold medal by EcoVadis, a leading provider of corporate sustainability ratings. This year, Alleima has also started to report its scope 3 emissions. This prestigious recognition of sustainable business practices places Alleima in the top 5% among the more than 150,000 companies assessed worldwide.

EcoVadis is one of the world's most trusted providers of business sustainability ratings, intelligence, and collaborative performance improvement tools for global supply chains. The methodology used by EcoVadis is based on international sustainability standards and supervised by a scientific community of sustainability and supply chain experts. EcoVadis looks at how companies implement sustainability across their supply chain.

"We are proud that we once again have been awarded the EcoVadis gold medal. EcoVadis is an important tool for us when evaluating sustainability aspects among suppliers in the value chain. Our gold medal provides an opportunity for our customers to evaluate us in the same way," says Håkan Sundström, Head of Sustainability and Governance at Alleima.

"Receiving the gold medal is a significant recognition of our focus on sustainability. We look forward to continuing to strengthen our work within sustainability in the years to come."-says Camilla Norling, Sustainability Controller at Alleima.

Alleima has a relatively low climate footprint from operations due to the use of recycled steel (>80%) and fossil-free electricity in production facilities and is committed to minimizing its social and environmental impact through reducing its water usage, careful chemical management, and effective use of by-products such as slag, dust, and process gases.

EcoVadis rates performance of 21 sustainability criteria, in four themes: environment, labor and human rights, ethics and sustainable procurement. It is based on leading standards, and it is supervised by an international scientific committee. The scoring is based on the company's policies, actions and results, as well as inputs from third-party professionals and external stakeholders.

Some highlights from the report

- Alleima is in the top 3% of companies rated by EcoVadis in the manufacture of basic iron and steel industry.
- In sustainable procurement, Alleima ranks in the top 1% of manufacturers in the iron and steel industry.
- Alleima's environmental score is in the top 1% of manufacturers in the iron and steel industry.
- In the category labor and human rights, score is in the top 13% in the industry
- For ethics, including information security, Alleima ranks in the top 9% in the industry.

About Alleima

Alleima, is a global manufacturer of high value-added products in advanced stainless steels and special alloys as well as solutions for industrial heating. Based on long-term customer partnerships and leading materials technology, we develop products for the most demanding applications and industries. Our offering includes products like seamless steel tubes for the energy, chemical and aerospace industries, precision strip steel for white goods compressors, air conditioners and knife applications, based on more than 900 active alloy recipes. It also includes ultra-fine wires for medical and micro-electronic devices, industrial electric heating technology and coated strip steel for fuel cell technology for cars, trucks, and hydrogen production. Our fully integrated value chain, from R&D to end-product, ensures industry-leading technology, quality, sustainability, and circularity. Alleima, with headquarter in Sandviken, Sweden, had approximately 6,500 employees and revenues of about 20 billion SEK in about 80 countries in 2024. The Alleima share was listed on Nasdaq Stockholm's Large Cap list on August 31, 2022 under the ticker 'ALLEI'. Learn more at www.alleima.com.
