

## Nordec awarded structural frame contract for new two-rink ice arena in Stockholm

**Nordec has been awarded a contract for the structural frame of a new ice arena facility with two ice rinks at Sättra idrottsplats in Stockholm. The project is being carried out for SSEA Svensk Samverkansentreprenadaktiebolag. The facility, developed by Hemsö, will include a match hall with seating for approximately 1,200 spectators and a second hall for training.**

In addition to the two ice rinks, the facility includes supporting spaces such as changing rooms, technical areas and service spaces. The total area is approximately 10,400 m<sup>2</sup>.

Nordec's scope includes steel structures, hollow core slabs, precast concrete elements, load-bearing sheets and sandwich panels. The structure is based on a steel column and beam system with roof trusses, enabling open rink areas with spans of over 50 metres.

"The large-span roof structures for the ice halls place particular demands on planning and installation. Nordec's experience from numerous similar arena projects, together with our design, production and installation expertise, ensures efficient execution throughout the construction phase". says Minna Kuusela-Opas, Senior Vice President, Multi-storey at Nordec.

Design work started at the end of 2025. Installation of the structural frame started in May 2026, and the project is scheduled for completion in summer 2027.

**About Nordec**

Nordec is a supplier of steel frame structures and façade solutions for construction projects across the Nordic region, with an established presence in Central and Eastern Europe, including Poland, Lithuania, the Czech Republic and Germany.

The company designs, fabricates and installs steel structures for buildings and bridges, covering the project lifecycle from engineering to installation. Projects range from industrial facilities, logistics buildings, data centres, commercial, public, sports and cultural buildings, and bridges.

Nordec operates its own production units in Peräseinäjoki and Ylivieska in Finland, Oborniki in Poland and Gargždai in Lithuania.

In 2025, Nordec reported revenue of EUR 236.7 million and EBITDA of EUR 13.4 million. Further information is available at [www.nordec.com](http://www.nordec.com).
