

## **Exide Technologies unveils new Solition Powerbooster Mobile: Delivering flexible and sustainable energy “On-The-Go”**

- **Solition Powerbooster Mobile offers flexible and zero-emissions energy buffering and supply – wherever, whenever**
- **Built with versatility in mind – ideal for various off-grid use cases such as events, construction sites, or outdoor EV charging**
- **Available with storage capacities of 200 and 400 kWh**

**Gennevilliers, France (??/2024)** – Exide Technologies, a global leader in sustainable battery energy storage solutions, is excited to introduce the Solition Powerbooster Mobile, a smart, flexible, and easy-to-transport energy storage solution designed for easy transport and simple set-up to meet growing calls for clean, reliable power delivered everywhere.

Whether supplying energy for charging electric vehicles outdoors, supporting roadside assistance, powering events, or energizing construction sites, the Solition Powerbooster Mobile provides the flexible energy that businesses need – on demand, anywhere, anytime.

It is an addition to the state-of-the-art Solition Powerbooster series, the modular energy management and storage system that can be used to buffer power from the grid and avoid peaks. The new Solition Powerbooster Mobile offers many advantages that make it a valuable solution for a variety of applications and industries in need of flexible and transportable energy on demand.

Equipped with 200 kWh or 400 kWh LFP battery capacity, a single 180 kW or 2 x 90 kW chargers, and multiple 3-phase sockets, it delivers high efficiency and large capacity, making it ideal for emergency charging and high-demand situations. Its compact yet sturdy design caters to a wide range of needs.

The Solition Powerbooster Mobile is equipped with liquid-cooled batteries. It provides a zero-emissions and fuel-free alternative to traditional generators, making it an environmentally sustainable choice.

Serge Arbes, Exide Technologies Senior Business Director Global, Energy Solutions, said: “The Solition Powerbooster Mobile is a flexible, reliable, and zero-emission energy solution that caters to the specific needs for flexible energy supply on-demand. Whether it's charging electric vehicles, providing emergency roadside assistance, or powering events and construction sites, this product ensures they'll have the power they need on demand.”

## About Exide Technologies

Exide Technologies ([www.exidegroup.com](http://www.exidegroup.com)) is a leading provider of innovative and sustainable battery storage solutions for automotive and industrial applications. With 135 years of experience, Exide has developed and globally marketed innovative batteries and systems, contributing to the energy transition, and driving a cleaner future. Exide's comprehensive range of lead-acid and lithium-ion solutions serves various applications, including 12V batteries for combustion and electric vehicles, traction batteries for material handling and robotics, stationary batteries for uninterruptible power supply, telecommunication, utility in-front-of and behind-the-meter energy storage and propulsion batteries for submarines and more. Exide Technologies' culture and strategy are centered around recycling, sustainability, and environmental responsibility, reflecting the commitment to being a responsible corporate citizen.

The company has 11 manufacturing and 3 recycling facilities across Europe, ensuring resilience and a low CO<sub>2</sub> footprint with a local supply chain. Exide Technologies is committed to superior engineering and manufacturing. With a team of 5,000 employees, the company provides €1.6bn of energy storage solutions and services to customers worldwide, every year.
