

## **Exide Technologies achieves ISO 27001 certification for Information Security Management**

- **ISO 27001 certificate covers diverse IT and networking services**
- **Evaluation of all processes and security systems**
- **Implementation of a continuous improvement system, based on risk analysis, metrics, and indicators**

**Gennevilliers, France (20/02/2025) – Exide Technologies ([www.exidegroup.com](http://www.exidegroup.com))**, a leading provider of battery storage solutions for industrial and automotive applications is proud to announce that it has been awarded the ISO 27001 certification from AENOR, a renowned trust-generating entity, for its information security management and data protection practices. This prestigious international standard has been established by the International Organization for Standardization (ISO) and acknowledges organizations that have successfully implemented robust information security management systems and maintain the highest standards of data protection and resilience against potential threats.

The certification covers IT and networking services, IT systems for producing and shipping batteries, and internal services such as Sales, Marketing, Finance, HR, IT service management, and Unified Communication and Collaboration (UCC) services. The ISO 27001 certification underscores Exide Technologies' commitment to safeguarding its information systems and data.

Achieving this certification involved a rigorous evaluation of all processes and security systems, as well as the implementation of a continuous improvement system based on risk analysis, metrics, and indicators.

With 135 years of experience, Exide Technologies has been at the forefront of developing and marketing innovative battery solutions globally. Its wide range of lead-acid and lithium-ion solutions serves various applications, including 12V batteries for combustion and electric vehicles, traction batteries for material handling and robotics, stationary batteries for uninterruptible power systems, telecommunications, front and behind-the-meter energy storage, and propulsion batteries for submarines. The company's culture and strategy revolve around recycling, sustainability, and environmental responsibility, reflecting its commitment to being a responsible corporate citizen.

“This achievement is a significant milestone in our strategy to enhance data protection and secure operations across all business units”, says Martin Gaessl, Vice President and Group Chief Information Officer at Exide Technologies. This certification is a testament to our dedication to excellence in information security management. We extend our gratitude to AENOR for their thorough assessment and recognition of our efforts.”

## **About Exide Technologies**

Exide Technologies ([www.exidegroup.com](http://www.exidegroup.com)) is a leading provider of innovative and sustainable battery storage solutions for automotive and industrial applications. With 135 years of experience, Exide has developed and globally marketed innovative batteries and systems, contributing to the energy transition, and driving a cleaner future. Exide's comprehensive range of lead-acid and lithium-ion solutions serves various applications, including 12V batteries for combustion and electric vehicles, traction batteries for material handling and robotics, stationary batteries for uninterruptible power supply, telecommunication, utility in-front-of and behind-the-meter energy storage and propulsion batteries for submarines and more. Exide Technologies' culture and strategy are centered around recycling, sustainability, and environmental responsibility, reflecting the commitment to being a responsible corporate citizen.

The company has 11 manufacturing and 3 recycling facilities across Europe, ensuring resilience and a low CO2 footprint with a local supply chain. Exide Technologies is committed to superior engineering and manufacturing. With a team of 5,000 employees, the company provides €1.6bn of energy storage solutions and services to customers worldwide, every year.
