

Exide boosts Marine and Leisure portfolio with powerful lithium-ion battery

- **Exide's strengthens equipment category in Marine and Leisure range**
- **New Exide Marine & Leisure Equipment Li-ion - EV1920S 12.8V, 150Ah battery**
- **Bluetooth, integrated heater and sleep mode included**

Gennevilliers, France (31/03/2026) – Exide Technologies (www.exidegroup.com) – Exide Technologies, the leading provider of innovative and sustainable battery solutions for automotive and industrial applications, has bolstered its Marine and Leisure battery portfolio with a new addition.

The powerful 12.8V, 150Ah lithium-ion battery – EV1920S – delivers high energy density and boasts user-friendly features, including integrated Bluetooth connectivity with a dedicated mobile app, an intelligent sleep mode to preserve power, and a built-in heater – delivering reliable performance in all weather conditions. The battery comes in LN5 size and can thus replace AGM or Gel equivalents. Delivering more energy within the same footprint, it's the ideal choice for demanding equipment-supply applications – especially for leisure boats and caravans.

Part of Exide Marine & Leisure Equipment Li-Ion battery range, complementing the ML Dual and Start categories, the EV1920S powers onboard functions, such as navigation, emergencies, safety and comfort systems. As these applications often involve partial or deep discharge, the specialized design of Equipment batteries – combined with an appropriate charging procedure – is essential for reliability and long service life.

Meeting the growing demand for lightweight, high-performance energy solutions, the Exide Equipment Li-ion EV1920S provides consistent power output, extended cycle life and fast-charging capability. Meanwhile, its advanced Battery Management System (BMS) protects the battery from misuse (over / under charge, over / under discharge or over/under temperature) and, therefore, gives the user reassurance while onboard.

Ready to use out of the packaging, easy to maintain and with the guarantee of uninterrupted supply, Exide's EV1920S is primed for the season ahead,

Guido Scanagatta, Director Product Management & Application Automotive at Exide Technologies, said: "By combining advanced lithium-ion technology with smart, user-friendly features, the latest addition to the Marine and Leisure portfolio will deliver long-lasting power for every onboard application. Our customers, therefore, can go into the season ahead with confidence and peace of mind."

Exide's new EV1920S complements the company's extensive Equipment lithium-ion portfolio, with sleep-mode capability available across all related models.

Details of Exide's Marine and Leisure battery solutions, including Equipment Li-Ion, Gel and AGM, as well as Dual and Start, can be found at

About Exide Technologies

Exide Technologies (www.exidegroup.com) is a leading provider of innovative and sustainable battery storage solutions for automotive and industrial applications. With more than 135 years of experience, Exide has developed and globally marketed innovative batteries and systems, contributing to the energy transition, and driving a cleaner future. Exide's comprehensive range of lead-acid and lithium-ion solutions serves various applications, including 12V batteries for combustion and electric vehicles, traction batteries for material handling and robotics, stationary batteries for uninterruptible power supply, telecommunication, utility in-front-of and behind-the-meter energy storage and propulsion batteries for submarines and more. Exide Technologies' culture and strategy are centered around recycling, sustainability, and environmental responsibility, reflecting the commitment to being a responsible corporate citizen.

The company has 11 manufacturing and 3 recycling facilities across Europe, ensuring resilience and a low CO₂ footprint with a local supply chain. Exide Technologies is committed to superior engineering and manufacturing. With a team of 5,000 employees, the company provides €1.5bn of energy storage solutions and services to customers worldwide, every year.
