## **Exide to exhibit future-ready CV battery solutions at Transpotec Logitec 2026**

- **Transpotec Logitec to take place between 13 and 16 May at Fiera Milano**
- **Exide to present CV solutions for the freight and logistic sector**
- **Exide located in Aftermarket Village – stand E24**

**Gennevilliers, France (30/04/2026) – Exide Technologies** (<http://www.exidegroup>), a leading provider of innovative and sustainable battery storage solutions for automotive and industrial applications, will exhibit at Transpotec Logitec 2026, taking place from 13 to 16 May at Fiera Milano. The international exhibition is recognized as a key European platform for road freight transport, logistics and supply chain innovation.

This year's edition places a strong emphasis on logistics integration and the wider transport ecosystem, featuring dedicated exhibition areas, conferences and networking initiatives that bring together operators, suppliers and industry stakeholders from across the supply chain.

Transpotec Logitec brings together manufacturers, fleet operators, logistics providers and technology suppliers, with the 2026 exhibition expected to build on previous attendance levels of more than 33,000 industry professionals.

Exide Technologies will be located within the Aftermarket Village at stand E24, a dedicated area for commercial vehicle (CV) aftermarket solutions and professional networking within the transport sector. The company will showcase its latest CV battery solutions, developed to support reliability, efficiency and performance in increasingly complex fleet operations.

“Transpotec Logitec provides an important opportunity to connect directly with fleet operators and wider industry stakeholders within an international logistics environment”, said Davide Massaro, Sales Manager AM Italy at Exide Technologies. “Our commercial vehicle battery range is well aligned with the evolving needs of this market, and we look forward to engaging with visitors throughout the show.”
