

Exide to exhibit future-ready CV battery solutions at Transpotec Logitec 2026

- **Exide exhibits at Transpotec Logitec, from 13 to 16 May, in the Aftermarket Village, at stand E24, hall 14**
- **Exide Technologies showcases its comprehensive portfolio of CV battery solutions**
- **The company highlights its streamlined CV battery range for modern fleets**

Gennevilliers, France (30/04/2026) – Exide Technologies (<https://www.exidegroup>), a leading provider of innovative and sustainable battery storage solutions for automotive and industrial applications, is participating in Transpotec Logitec 2026, which opens today, bringing together the international freight transport and logistics community.

Exide is exhibiting at stand E24 (hall 14) within the Aftermarket Village, presenting its latest commercial vehicle (CV) battery solutions to fleet operators, distributors and aftermarket professionals, following the recent streamlining of the company's CV portfolio.

As part of its presence at Transpotec Logitec 2026, Exide Technologies highlights its streamlined Commercial Vehicle battery portfolio, designed to simplify selection while meeting the operational demands of modern fleets. The line-up was recently optimized and consists of four clearly defined product ranges – GEL PRO, EFB PRO, SHD PRO and HD PRO – covering a wide spectrum of commercial vehicle applications, from intensive cycling and long-haul transport to standard duty use.

The streamlined structure is supported by an intuitive label design with clear color-coding by technology, enabling faster and more reliable battery identification and fitment in workshops and fleet operations. The CV portfolio reflects Exide Technologies' continued investment in product performance, manufacturing quality and sustainability, and is available across the company's premium battery brands, including Exide, Tudor, Fulmen, Centra and Sonnax.

Throughout the show, the Exide Technologies team is available at stand E24 to engage with customers and partners, demonstrating its commercial vehicle (CV) battery portfolio, developed to support modern fleet performance and operational reliability.

"Transpotec Logitec is a key meeting point for the transport and logistics sector, bringing together stakeholders from across the value chain," said Davide Massaro, Sales Manager AM Italy at Exide Technologies. "The event provides an ideal platform to present our commercial vehicle battery solutions and to engage directly with customers and partners."

About Exide Technologies

Exide Technologies (www.exidegroup.com) is a leading provider of innovative and sustainable battery storage solutions for automotive and industrial applications. With more than 135 years of experience, Exide has developed and globally marketed innovative batteries and systems, contributing to the energy transition, and driving a cleaner future. Exide's comprehensive range of lead-acid and lithium-ion solutions serves various applications, including 12V batteries for combustion and electric vehicles, traction batteries for material handling and robotics, stationary batteries for uninterruptible power supply, telecommunication, utility in-front-of and behind-the-meter energy storage and propulsion batteries for submarines and more. Exide Technologies' culture and strategy are centered around recycling, sustainability, and environmental responsibility, reflecting the commitment to being a responsible corporate citizen.

The company has 10 manufacturing and 3 recycling facilities across Europe, ensuring resilience and a low CO₂ footprint with a local supply chain. Exide Technologies is committed to superior engineering and manufacturing. With a team of around 5,000 employees, the company provides €1.5bn of energy storage solutions and services to customers worldwide, every year.
