

Mayapada Healthcare Partners with Encare and the ERAS® Society to Launch Indonesia's First Official ERAS® Implementation Program

Mayapada Healthcare has become the first healthcare group in Indonesia to collaborate with Encare and the international ERAS® Society to implement the country's first Official ERAS® Implementation Program (EIP). The program will initially be introduced within Orthopedics (Hip & Knee).

Mayapada Healthcare operates several hospitals across Indonesia and is now launching the country's first Official ERAS® Implementation Program.

The EIP will first be implemented at three of the group's leading hospitals: Mayapada Hospital Surabaya (MHSB), Mayapada Hospital Jakarta Selatan (MHJS), and Mayapada Hospital Kuningan (MHKN). This milestone marks a significant advancement in perioperative care in Indonesia, as these hospitals work toward becoming the first in the nation to achieve official ERAS® Society Qualification. Implementing the ERAS® protocol adds significant value by enhancing patient comfort and accelerating recovery after surgery.

Driving International Best Practices in Surgical Care

The ERAS® Implementation Program (EIP) is the globally validated, structured methodology developed by the ERAS® Society and Encare. Supported by the ERAS® Interactive Audit

System (EIAS), the program enables hospitals to benchmark outcomes, monitor compliance, and drive measurable and sustained improvements in surgical care.

“This collaboration with Mayapada Healthcare represents a landmark step for ERAS® in Indonesia,” says Rasmus Waller, CEO of Encare. “Mayapada Healthcare’s strong commitment to quality and innovation makes them an ideal partner. Together, we will establish new standards for enhanced recovery and significantly improve outcomes for orthopedic patients across the country.”

Dr. Dini Handayani, MARS, FISQua, FIPC, Director at Mayapada Healthcare, adds: “Our collaboration with Encare and the ERAS® Society reflects our mission to deliver world-class patient care. Implementing the ERAS® program will elevate surgical recovery, reduce complications, and strengthen the overall patient experience at our hospitals.”

Advancing Global Standards Through the ERAS® Society

The ERAS® Society is the worldwide scientific authority behind ERAS®, developing multidisciplinary, evidence-based guidelines that improve recovery after surgery. Through its partnership with Encare, the Society integrates its protocols into the EIAS platform, enabling consistent implementation, standardized pathways, and continuous quality improvement.

About EIAS

Encare’s innovative SaaS solution, the ERAS® Interactive Audit System (EIAS), supports healthcare providers in improving patient recovery after surgical procedures. Through EIAS, Encare provides digital tools and training to implement ERAS® programs in hospitals, aiming to enhance patient outcomes, reduce complications, and shorten hospital stays.

About Encare

Encare is a HealthTech company that develops a SaaS solution that contributes to improving surgical outcomes. Encare’s interactive, cloud-based solution enables healthcare providers to follow international treatment guidelines before, during, and after major surgical procedures. Encare's service contains programs, so-called protocols, based on the international guidelines ERAS®, Enhanced Recovery After Surgery, built on research and global best practice. Encare was founded in 2009 by Professor Olle Ljungqvist, one of the founders of the ERAS® Society – a network of world-leading perioperative care authorities that develops the guidelines. In 2022, Professor Ljungqvist was awarded the most prestigious prize in the world of surgery by the International Society of Surgery (SS/SIC) for his work with ERAS®.
