

Heart Aerospace joins European Regions Airline Association

Swedish electric aircraft manufacturer Heart Aerospace joins European Regions Airline Association (ERA), a trade association for European regional airlines and associated businesses.

Founded in 1980, ERA is a non-profit trade association representing over 55 airlines plus around another 150 companies involved in European air transport and is the only association that brings together the entire spectrum of companies involved in European aviation. The association supports and defends the airline industry in providing safe, efficient and sustainable air connectivity to all regions of Europe. By lobbying European regulatory bodies on policy matters, ERA promotes and protects social responsibility, environmental sustainability and the development of regional economies and local communities.

For Heart Aerospace, membership of the ERA will be an important platform for cooperation and the exchange of ideas for sustainable growth of the European regional airline industry.

“We believe that electric air travel can be transformational in addressing the industry’s key sustainability challenges, and we look forward to working with the ERA in shaping the future of regional air travel in Europe,” said Anders Forslund, CEO of Heart Aerospace.

“ERA is committed to supporting a transition to more sustainable aviation; hence, we are very pleased to welcome Heart Aerospace into membership. Heart is a pioneer for sustainable aviation, and with its mission to create not only the world’s greenest, but most affordable and accessible form of transport, I am sure the company will play a significant role in the future of Europe’s regional air sector,” said Montserrat Barriga, Director General, ERA.

About Heart Aerospace

At Heart Aerospace we work at the cutting edge of technology while contributing towards a sustainable future. Heart's mission is to create the world's greenest, most affordable, and most accessible form of transport. This mission is grounded in the outlook that electric air travel will become the new normal for regional flights and can be transformational in addressing the industry's key sustainability challenges. Our investors include Breakthrough Energy Ventures, EQT Ventures, European Investment Council, Lower Carbon Capital, Mesa Air Group Inc and United Airlines Ventures. Our main offices and hangar facility are located at S  ve Airport in Gothenburg, Sweden. www.heartaerospace.com
